Premier W. L. Mackenzie King Speaks Encouragingly in Ottawa House

OTTAWA, December 3 (Canadian Press) - Prime Minister William Lyon Mackenzie King told the House of Commons yesterday that the position of Great Britain, while still serious, was definitely superior to the position at the time of the fall of France or at any time since. He said that the war would be one of years and there would inevitably be periods of sunshine and shadow but it would be unwise to become unduly depressed or elated over any single set of circumstances.

Premier King said it was the duty of the government to view the war steadily and, in doing so the government was, following a policy of planning in co-operation with the British government for a victorious outcome of the struggle.

General Synopsis-A deep depression is centred off Kodiak Island and the pressure is relatively high over the state of Utah. Unsettled weather has been general throughout British Columbia with heavy rains on the coast.
