IS NO SURPRISE

There is nothing surprising or unexpected about the heavy bombing of London. The surprise is that it did not happen weeks or months ago. Evidently the British heavy bombing of German boat and troop concentrations on the coast of France, Belgium, Holland, Denmark and Norway has had the effect of delaying the expected invasion of Great Britain. Also the attacks on airdromes, oil supply stations, oil factories, munitions factories and railway and canal transportation facilities have had the effect of causing dislocation of the German plans.

Carrying the war into the heart of Germany is the most effective way of fighting this war. It is the best kind of defence and has already proved itself. As more planes are secured the raids will become more numerous and the results will be felt more and more as time goes on.

MONEY CAN BE SECURED

A number of people seem to have had the idea that they cannot take their money out of the banks. In fact, some person has been sedulously trying to spread a rumor to that effect. Inquiry from the banks shows that any person can get money from the bank as long as he has it there. No restrictions have been imposed as to how much they may draw. The only restriction is against sending money out of the country.

It seems that it is customary when a client wishes to close out his account and draw out all his money, the bank inquires what are his plans. The banks like to know why the money is taken out. He naturally wishes to know if it is any action of the bank that has been the cause of withdrawal. So questions are often asked. Beyond that the banks do not go. They pay over the cash when asked to do so.

We mention this because some people have been worried over whether or not their money was available for their use when they need it.

Recently the government took to itself the power to take over or direct wealth as it may require it. It will never interfere with small depositors. What the government needed was the power to direct industry in the channels where production was necessary and, if desirable, to check or direct into proper channels all production.

There is a law in this country that makes it a criminal offence to disseminate false information which might tend to cause a run on the banks. That is one thing that might engage the attention of fifth columnists and has to be watched. Action of this kind should be immediately reported to the police or one of the bank managers.

Astonished At Description Of Prince Rupert

The Prince Rupert Chamber of Commerce, at its meeting last night, heard from the University of Michigan the following letter read by the secretary:

"I have your kind letter and the accompanying map of Prince Rupert and copies of descriptive folders for which I thank you. These are being put to use in discussions of completely planned new cities of North America. It is a matter of astonishment to most students here who, by the way, come from all parts of the country that there is a planned city located so far into the north-west. I suspect a description of were Mrs. Chris Jensen, first, and Roy Elertsen, second. The correct number of candies in the jar was 83.
