Different Minds - - -

There are everywhere people of different tendencies. he ordered: "they must be ready! Their minds work differently. Now and then we meet three nights from now." people who always have some word of appreciation or "Impossible." cried the works encouragement. They like something you have written or manager. "I command!" roared Goering. they appreciate some feature in the paper. It is a pleasure The crews will be here at the time to meet them. Then there is the person who always has stated." a kick coming. Something the paper has published or The time came, and so did the failed to publish is criticized but there is never a word of crews. German efficiency had triappreciation.

A newspaper never minds constructive criticism. Any- for their target-England. thing helpful is appreciated. It also makes life a little! more pleasant if now and then the newspaper reader lets; us know what he likes to read and also logs us know when he appreciates something that has beer written.

Was Not Featured - -

The news of the treaty signed recently by Russia and Japan was not published in Germany. Evidently it was not considered favorable to that country. The well known news commentator, Ramond Gram Swing, suggested that the new treaty weakened the agreement Japan had with the Axis. Should Germany attack Russia, it seems likely NO TIME that the more recent agreement with Russia would make it impossible for Japan to side with the Axis and that would disrupt the whole combination. Italian newspaper mentioned the new treaty but made it seem of no importance.

Will Germany Attack Russia? - - -

A number of writers continue to assert that Germany plans to attack Russia. They reason it out in various ways, mostly the need of oil supply as the great induce-

In his book, Hitler made the taking of the Ukrainian' wheat lands part of this big scheme of conquest and, if this is to be followed out, it should be done soon. For weeks past these writers have been saying that Russia is feathers. to be one of the next victims of German aggression. Will Russia calmly await the attack or take up the challenge and attack Germany while there is a chance of winning?

A despatch received yesterday indicates that Russia we wonder if the A.T.S. 'sergeant' is following out an appeasement policy with Germany. If who wants to white feather us she does that she is likely to get about as good results as knows that we work seven days a did Britain and other appeasement nations.

Norman Angell's Views - - -

Norman Angell, apostle of peace, the man who wrote gested that perhaps tar should be a book telling about the futility of war, now says that, if added to the feathers for those Great Britain had taken a strong stand against Japan at whose wartime service is tea-drinkthe time of the Manchuokuo conquest by Japan, there ing. would have been no war today. It takes no particular brains to come to that conclusion. It has seemed evident a letter from the mother of two to most people for a number of years. If Great Britain had failed to loan money to Germany for her rehabilita- Service): tion and, if the League of Nations had taken a firm stand but I venture to say that neither when it knew Germany was rearming, there might have one of them is doing the work I am been no war today. If Britain and France had refused to doing-without glory, uniform or allow Hitler to get away with his seizure of the Ruhr and pay either. so on ad infinitum, here might have been no war. It "They tell me that they are not would be easy to find at least a dozen or perhaps a score complain of that. I have my house of "ifs" that would fit into the situation. What was evi- and shop to look after, drive an amdent was that Britain had no intention of trying to pre-bulance, take my turn in ARP vent the just aspirations of any nation but, evidently, work and fire watching." there were administrations in Britain that had read Nor-L man Angell's book and tried to be pacifists when they we to be called cowards and given should have been militarists in a world in which militarism white feathers? No we don't wear was all powerful.

We think that much of what Mr. Angell wrote was ter which we do part-time shelter true. We do not see anything but loss for everybody in service, go on fire-watch duty at this war, no matter who wins. Yet when this struggle is first aid stations—after our day's over we shall probably find a peace movement in force work is supposed to be done." that will be so strong that the Germans will be given more! One girl who received a white favors than the victors and even our own country will re- feather had two brothers and her fuse to recognize that in this age of quarrelsome countries and quarrelsome people a country must be strong members of the family and takes enough to hold its own and to enforce good international regular turns in ARP, work and laws and fair dealing.

MART appearance - strength - long life - easy pedalling - sure-acting coaster brake - all of these and a dozen other things that you get in a C.C.M. Bicycle are important. But the most important of them all is the Accuracy with which C.C.M. bicycles are built.

A C.C.M. is a beautiful piece of precision-built machinery down to the smallest detail. Particularly is this true of the main moving parts - the front hub, the rear hub, and the hanger to which the main sprocket, cranks and pedals are attached. These parts are carefully machined by precision tools and are closely tested for

Thus the fast moving parts fit so accurately together and work with such sweet harmony that very little legpower is required to make the C.C.M. move swiftly along the road. It's this amazing accuracy that is the secret of the C.C.M.'s smooth, quiet running, and the long life of

Even a small imperfection in the machining of a fast-working part, or a bearing that is not quite true, can set up a surprising amount of internal friction, which, if continued day after day, will shorten the life of the bicycle and make it harder to pedal. C.C.M.'s extreme accuracy in manufacture safe-guards against this.

Therefore, when you go to buy your bicycle look for the things that count. First for C.C.M. Accuracy. Then for C.C.M.'s Chromium plate over 20-year nickel; C.C.M. Frames of steel tubing; C.C.M.'s free-running Coaster Brake; E.C.M. Hanger; Dunlop Tires; and other famous C.C.M. features. Choose a bicycle that comes from the plant where Accuracy is the watchword of the institution. It's your assurance of long years of riding satisfaction.
