While there have been delays in production and in enlisting, the work done so far is very creditable for a country such as this.

### Who Is Enlisting? - - -

Most people have been very surprised at the type of said that before." young men who are enlisting. One man tells me he can point to a dozen families, the heads of which have always been critical of Britain and things British and apt to jeer! a little when others utter loyal sentiments. These people practically all have sons in some branch of the service, men who were among the first to volunteer. Then there were the people who talked a great deal of loyalty to Britain. Their sons are still at home or at the University.' It is difficult to understand.

#### Japanese Census - - -

The taking of the census here reminds us that the Japanese government is also said to be taking a census of all its nationals and people of Japanese origin. Statistics are being gathered as to the 30,000 people in this country. The Japanese have found out where they live, what is their wealth and all particulars about them. This information is not being obtained for the fun of it. We are wondering what it is all about, especially since the Japanese seem to be definitely aligned with the Axis powers and are making things very unpleasant for the British people on the other side of the Pacific.
