have neglected the growing of flow ers. L'am basing my judgment on a special number of the St. Catherine's Standard which, in an edition of ninety-six pages, did not find room for even a quarter of a page of flower gardens. After lookling it through I have come to the conclusion that they do not have any flowers in the peninsula worth small room about the size of a showing or they certainly would larder. In it 2,000 bettles resembhave at least one picture. After ling pint milk bottles are stacked hearing so much of the Niagara from floor to ceiling. They repre-Peninsula it comes to me as a sent, said Col. Whitby, "the difgreat shock to find that it is pre- ference be ween life and death to sumably without flowers or that amproximately 20,000 comulties." flowers are so little esteemed that is not considered worth while to without which thousands would

> when the rain commenced but the next day all that had disappeared. Now it is almost possible to hear the plants grow.

This is a good aubretia year. This showy rockery plant does not always winter well. In sheltered garit usually winters without loss. This plant comes in many shades of mauve and purple and is by far the best rock plant for our climate.

I regret not having to visit many gardens this year so far. There is so much work to be done that I blaze of color when passing the feel I do not have the time and en- homes of R. M. Winslow and D. C. ergy this year but later I hope to be McRae. The combination of white able to see some of the newer op- arabis and golden alyssum was the erations and also a few of the old outstanding feature. When a group ones. If I do not come it is not of homes get together and arrange because I do not want to.

this year. The prices are nigh and time to sow seeds of Alyssum Saxa-! many dealers do not carry much tile (Golden Alyssum) for next variety. We shall have to await the spring blooming.-H. F. P. after-the-war period to get a proper supply. Those who acted promptly have in some cases been supplied.

I see notices of a New Zealand spinach which produces huge bushes of green leaves that taste like spinach and may be cut as needed while the plant continues to grow. One full grown plant is said to be als large as a bushel basket. It is planted as soon as the ground is warm. I have no idea where to get seeds but some of the houses must be handling them.

Some of the dwarf plants are disappointing here. They usually develop slowly and heavy showers of rain will mess them up rather badly. I have yet to see a good display of ageratum and lobelia is rather late in developing although it makes a fine display when it is out. Daisies do well and many people like "Little Gem" alyssum.

Last night I drove along Fourth Avenue and was struck by the
