## Need For Housing - - -

It would be impossible for the work at the shipyard to be a complete success without proper housing facilities for the men employed so that they may bring their families to live in the city. The federal government realizes this and, where the need is really great to enable the proper carrying on of a vital war industry, they sometimes build houses for the use of the families of employees. This, it is proposed here, it to be in the form of four and five room cottages, built in groups or possibly in one large group according to where the sites are available.

The Prince Rupert Chamber of Commerce has been working on this for some time and, if it comes to a satisfactory conclusion, it alone is enough to justify the existence of the Chamber of Commerce. In this connection it, also must be noted that the Provincial director of industries, recently placed at Ottawa by the provincial government, it taking a leading part in getting in contact with the proper officials and placing Prince Rupert's need before them.

## A Comparison - - -

"Canadians are impressed, and rightly so, with the volume of aid that the United States is giving Britain in this war. The transfer of destroyers, the Lend-Lease Bill, the supplies of arms . . . we admire these gestures of our great neighbor. Indeed, somethimes we feel that America's contribution overshadows our own. But in that we do ourselves an injustice," says the News Herald.

"Canada has no reason to develop an inferiority complex over this business-that is shown by a comparison of Canadian and U.S. efforts recently made by the Minneapolis Star Journal.

"Says the American paper, in part: 'If the United States were matching Canada's efforts, in proportion to population, we should have an American Expeditionary Force of a million men . . .

"'Canada will be turning out 250,000 pilots a year . . . If the United States were doing likewise, relatively . . . we would be turning out 250,000 a year. (Actually it has GROTTO IS trained 5000 pilots in the last 12 months.)

"Canada's war budget for this year is larger, in proportion, both to population and to national income, than ours will be for next year . . .'

"Of course, as the star Journal neatly puts it: 'Canada! is waging a declared war on Germany . . . ' Well, that still' leaves our neighbors with a record to shoot at."

## Speeding Up Nature - - -

It is interesting to note the subjects in which the American people are interested. One of them says that experimenters at Columbia University have asceretained that the smallest amount of light visible to the human eye is a blue-green flash lasting one-thousandth of a second. until the fifth inning when the extra wheel. The remarkable thing about such extreme sensitivity is take the lead 6 to 5. Then in the Jim appears to rest his trust that only a small amount of that minute piece of light sixth they got five more while their very largely upon his pitcher, penetrates the outer cornea and reaches the seeing mechanism, the retina.

Suchinstances of the body's efficiency are often cited were even-seven all. in rather contemptuous reference to devices made by man, which haven't a fraction of that efficiency.

But nature has been working on man, and perfecting soto. him, for millions of years, while man's preoccupation with, tools and gadgets covers only a few thousand years at

If the radio is a less marvelous development than the a score of 17 to 3. human hand (the thumb of which revolutionized man's skill and domination of the world) it isn't a poor achievement for a few decades' work. It's safe to assume that ford. nature, usassisted, could not have evolved a radio in a couple of hundred million years.

# People's Party Losses - - -

The recently formed Pople's party did not make a very good showing at the East Edmonton election Monday. Its champion was A. A. McLod, editor of the Canadian Tribune, and a follower of Mrs. Neilsen, the farm lady who caused something of a stir in Ottawa recently as being the champion of the poor people of Northern Saskatchewan. There were three candidates in the field. Mrs. F. C. Casselman who led the field with 7,500 votes; Orvis Kennedy who displayed the banner of the New Democracy along with that of Social Credit and who scored 4,100 while Mrs. Neilsen's candidate was supported by only

"IRON DUKE" TOURING CANADA

Two veterans of the blitz-Malcolm MacDonald, British high commissioner to Canada, and Mrs. Lionel Gibbs of London and Winchester—enjoy a cup of tea drawn from the five-gallon urns of the "Iron Duke," the bomb-scarred mobile tea canteen which is touring Canada under the auspices of the Queen's Canadian Fund for Air Raid Victims. The daughters of Sir Harold Snagge, chairman of the works which manufactures the motors for the R.A.F.'s Typhoon fighter plane. Mrs. Gibbs is acting as hostess during the "Duke's" Canadian tour. During its six months service in the Battle of Britain, the veteran tea canteen was under Nazi fire 33 times. It will be exhibited at the Canadian National Exhibition this year.
