EDITORIAL

For those of us who favor the Hazelton route the recommendation of the Alaska Highway commission is a disappointment. We had hoped the commission would find the advantage of the coast route would outweigh the disadvantages and that the highway would come far enough west to be an advantage to the whole interior country. However, we have to acknowledge that the interior route has its advantages.

Judging from the report received yesterday of the findings of Canadian section of the highway commission, FOR SALE 4-room house, Seal the United States section of the commission may be quite different from the Canadian and there is nothing to indicate how the matter will be finally decided. Presumably, the United States members will favor the Hazelton route FOR SALE-Household doors, 5 and, if they put up the greater part of the money for the work of construction, their choice should have the greater weight.

One important feature should be that the highway Third Avenue. by way of the Yukon does not serve Southeastern Alaska whereas from Hazelton it would not be difficult to build into Prince Rupert and ferry to Ketchikan. Should the WANTED-100 women to join An-United States and Canadian relations become closer than nette's stocking club. at present it is to be presumed that the trade relations of Ketchikan and Prince Rupert would be greatly improved and steamship services between the two places become wanted by gentleman, furnished much more frequent. Cars would often go south by way of Prince Rupert and the highway. All these possibilities have to be considered and provided for.

Wooden Vessels Needed - - -

The suggestion made several times in the past and mentioned again by W. Lloyd Craig yesterday as one of the possibilities is that coast patrol boats be built at the WANTED-Local girl for boarding dry dock which would be useful for war purposes until the war is over and then be converted into halibut fishing boats for fishing in the westerly halibut waters. This seems to have been proposed first by L. W. Patmore K.C. Now as one way of keeping alive the fall halibut fishing and revived later in connection with meeting the present need. On the surface it looks like an excellent plan. Canada should get a larger share of the fishing from the July and August and possibly September fishing.

DEPARTMENT OF LABOUR

CANADA

Your Government desires to avoid the vicious spiral of inflation. To do so it is curbing price increases; rents are controlled; profits are restricted and highly taxed. But this is not enough.

The effect of these controls would be offset if no control were placed on basic wages. The unregulated race between wages and cost of living would produce an inflation harmful to all Canadiansexcept the profiteer—while it lasted, and disastrous in its aftermath.

In place of any increase in basic wage rates, which would thereby increase prices and which workers are asked to forego, your Government has provided by Order in Council 7440 that a cost of living bonus be paid to protect the workers against price increases in basic necessities.

This bonus is not a wage increase. It rises and falls automatically with living costs. It provides 25 cents per week for each rise of one point in the cost of living except where juvenile or female workers earn less than 50 cents per hour

in which event they receive 1 per cent. of their basic wage rate.

This order has the following advantages:

- -In relating bonuses to cost of living it checks the race between wages and prices.
- Being on a flat rate basis it favours the lower paid workers.
- It enables both employer and employee to determine the amount of the bonus payable. It so removes one cause of labour friction. It makes for industrial stability in this time of war.
- 4—It is the fairest possible plan for the worker, the employer and the taxpayer that has yet been devised.

As this order is applied and both employers and employees observe it in the spirit and in the letter its beneficial effects will become increasingly apparent. It will, too, contribute to an ever increasing production of the tools of war.
