Meanwhile the ex-monarch's political position developed disappointingly. When leaving the throne he had said:

"My conscience tells me that this shunting of popular feeling away from the monarchy) will not be for long."

Three years later a swing of the republic's electorate towards, the conservative parties gave point to this prophecy but it was shortlived. Then when civil war started in Spain on July 17, 1936, with a revolt of monarchists, rightists and military men against the leftiet. government, Alfonso and his heir moved mysteriously about Europe and were said to be preparing for a restoration of power.

That old line of rival Spanish kings had maintained its claims to the Spanish thron? for a century but the death of Don Jaime of Bourbon, six months after Alfonso's dethronement, had removed the last active pretender of the family. But as the insurgents drove to the outskirts of Madrid and won control of two-thirds of Spain, the monarchists in the organization fell into disfavor with General Francisco Franco, commander-inchief. Alfonso's hopes were dashed when Franco was named "el caudillo," Spanish equivalent of "il Domestic incompatibilities left duce" or "der Fuehrer," of the the exiled King Alfonso of Spain movement and then, in February, with only his younger daughter, 1937, proclaimed that "the new Maria Cristina, as his "home" Spain will represent a national companion.
