Fnemy Are Successful in Reinforcing Their Troops in Guadal Canal

WASHINGTON, D.C., Oct. 10 (P) The United States Navy announced today that a Japanese destroyer had been sunk and a destroyer and cruiser damaged when dive bombers and torpedo planes attacked enemy warships backing up landing operations at Gudal Canal in the Solomon Is-! lands. The enemy succeeded in reinforcing troops on Guadal Canal, the site of an American air base! in the Solomons, despite resistance from United States air forces.

REPORT ON BLACKOUT

An official precautionary blackout for the Prince Rupert Area was called early on the morning of October 9 at 3:48 a.m. and the "all clear" was given by radio at one minute to seven the same day over the local radio and by turning on the street lights in the city.

Some confusion resulted in the day and evening due to the local radio going off the air suddenly, caused by a bulldozer working in the rear of the radio station knocking down the poles of the antenna, which were replaced during the afternoon.

This was further increased by an unauthorized statement in the local press that the all clear was given shortly after 10 a.m. To rectify this unauthorized announcement by the press, radio announcements were made over the radio that the blackout would continue until further notice. It was a relief to all concerned when the "all Clear" was sounded at 7 p.m.

The cause of this condition was due to:

I. Unauthorized publication of the "all clear."

2. The accident to the radio

station. 3 The careless attitude of the

public in not studying the sig- ATTACKS

To try to clarify the latter, a Precautionary Signal of one continuous blast of the sirens for a period of five minutes is given. This necessitates a blackout of all premises and of cars and bicycles, unless properly equipped, when all civilian traffic can proceed at a speed not exceeding fifteen miles per hour. This precautionary blackout is given as above and no other signals are given, even if this condition may last for several days. This signal is cancelled by an all clear given by an authorized notice in the press and by radio. The Imminent Danger signal gives an oscillating or undulating with a rising and falling note

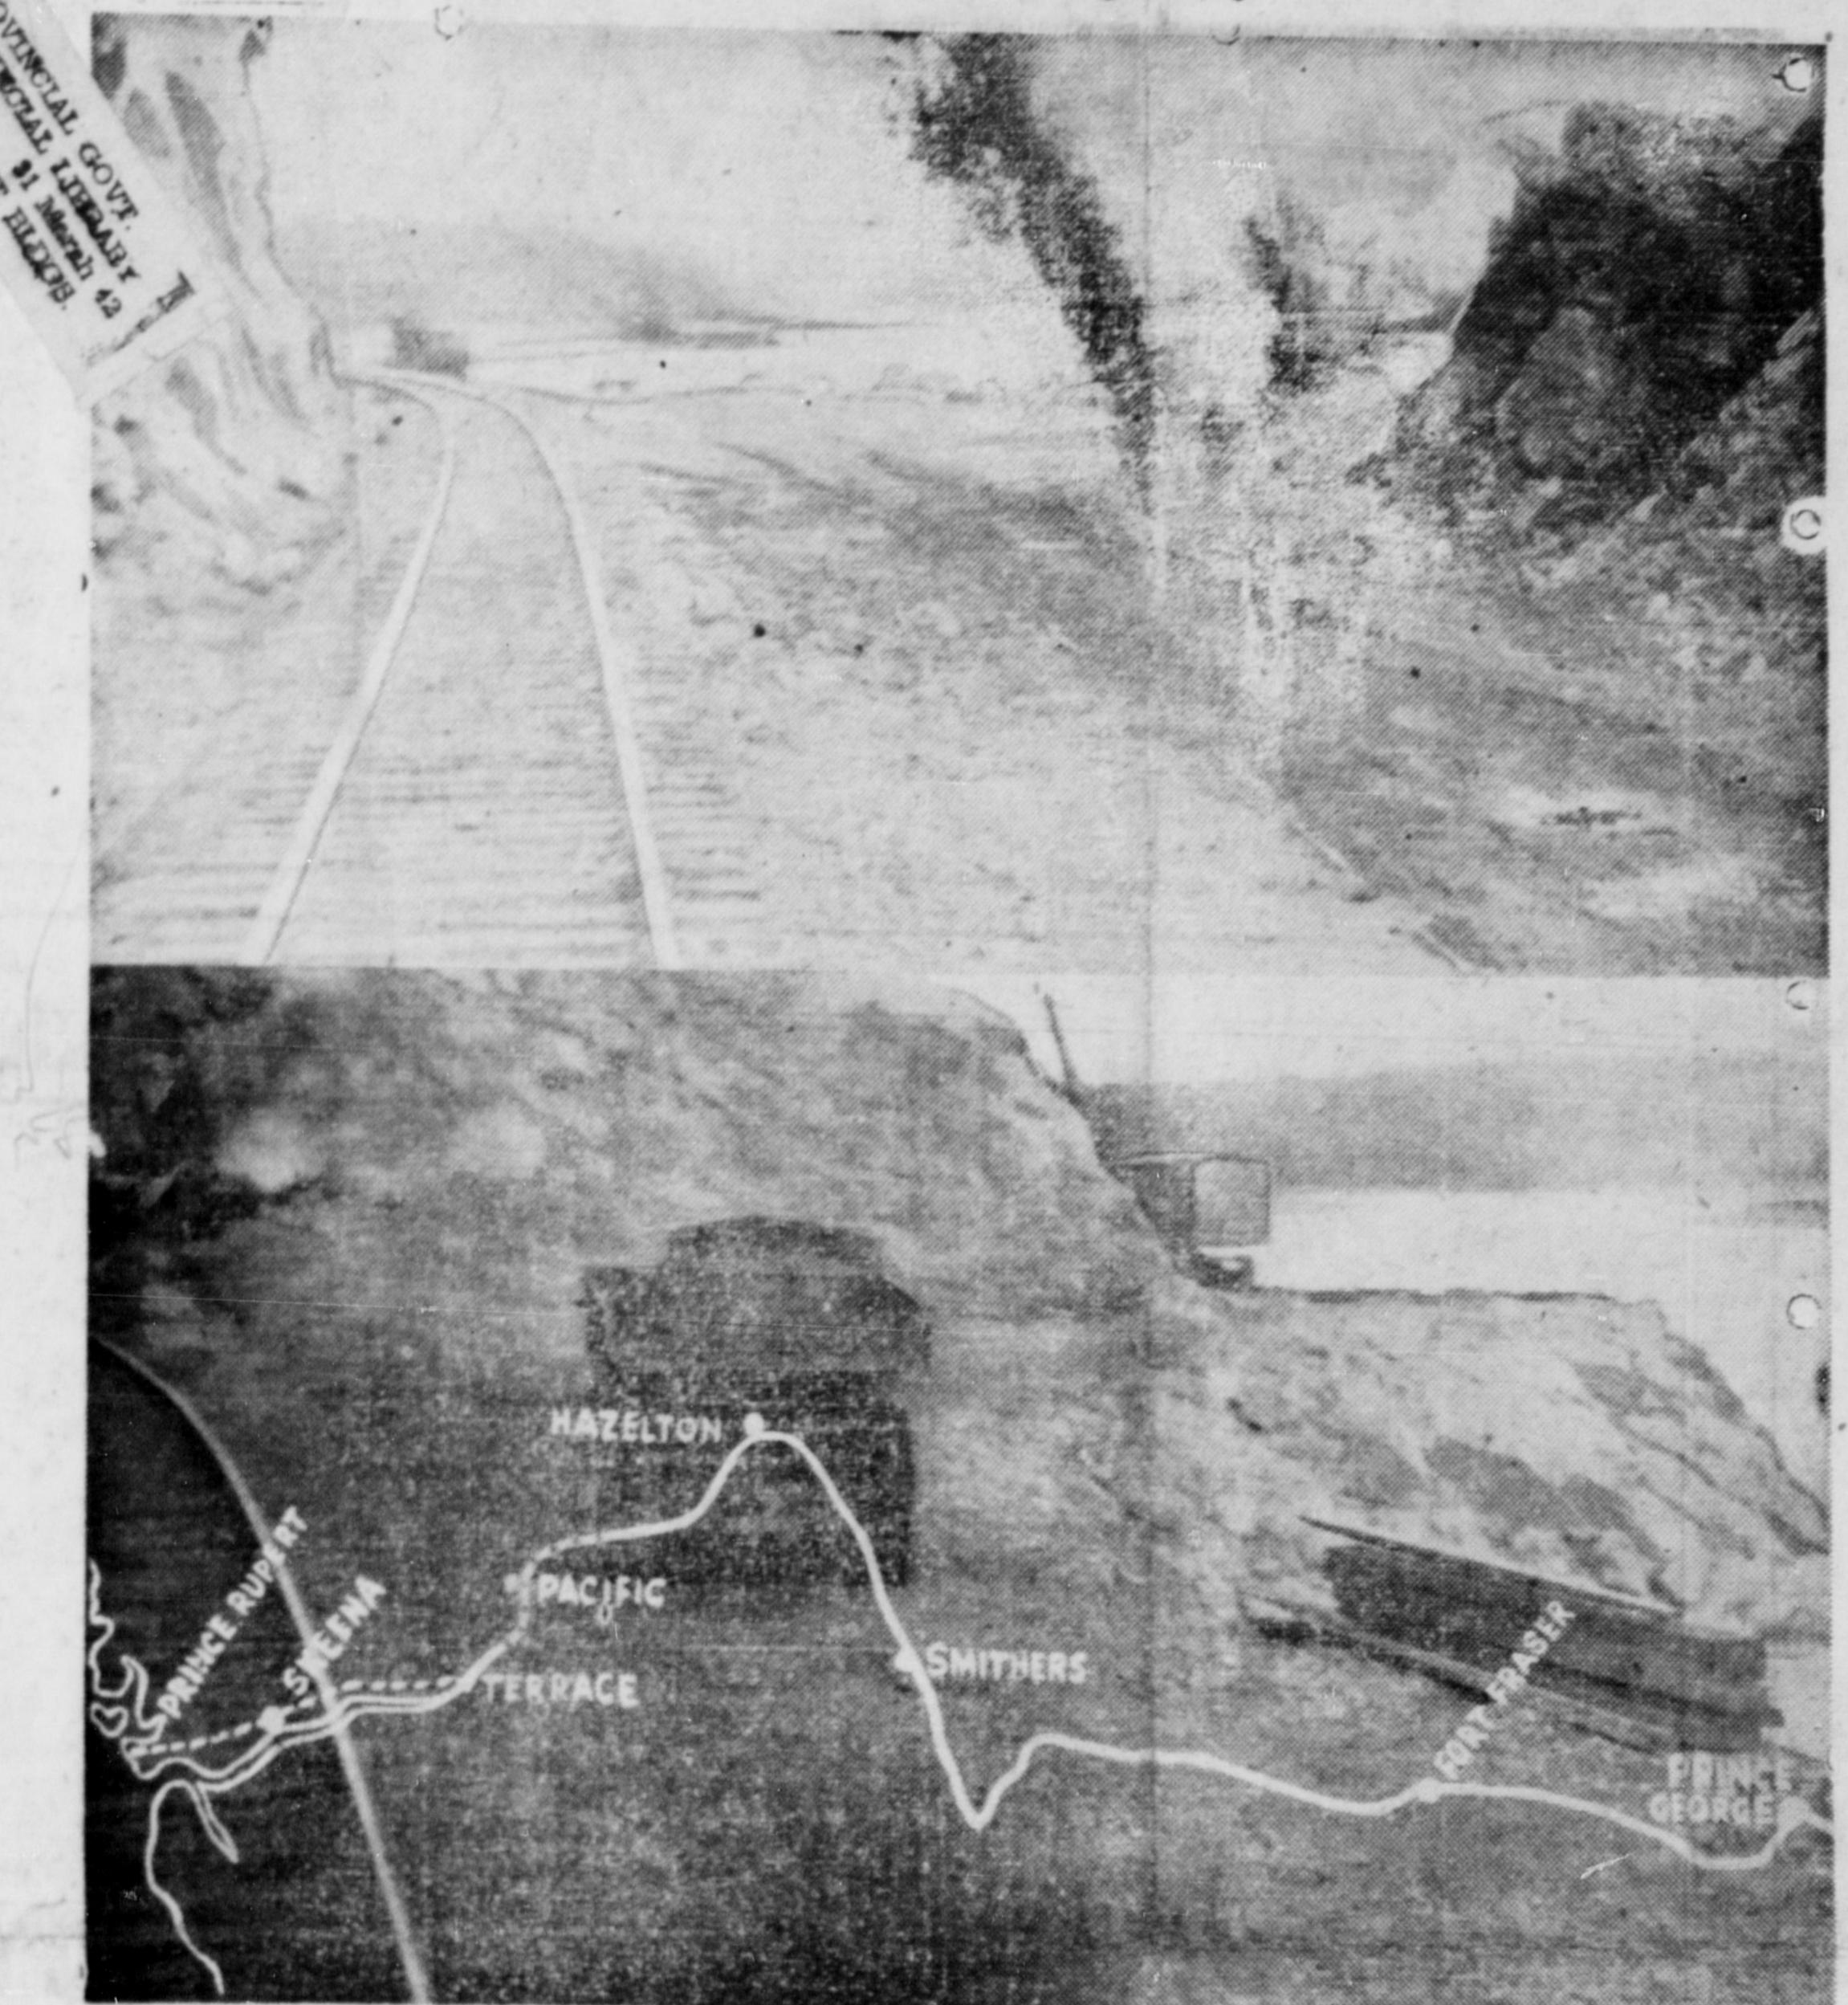

have left the vicinity but the Blackout must still continue.

several days. If the people would discuss by John Moser. these signals with their wardens, , + + + + + + + + + there should not be any further confusion and, incidentally, they will save themselves and their families an unnecessary amount of worry.

Skeena River Highway

ROAD-BUILDING BLITZ-The 170 miles of rock cliffs and swamplands that separate Prince Rupert from British Columbia's highway system are being subdued by eight Canadian contracting firms in an all-Canadian road blitzkrieg. At intervals along the steep banks of the Skeena men and road-building equipment are rushing the 20-foot highway to completion.

In the lower picture a steam shovel is seen perched on the edge of the river digging into a pyramid of rock, while above is seen a section of the new roadbed running alongside the railroad tracks, with the Skeena in the background. Route of the new highway is outlined

The National War Finance Committee, public relations section, has provided the Daily News with a number of attractive illustrations for use in connection with sponsored newspaper advertising for the Third Victory Loan campaign.

The co-operation of all business people in supporting the Victory Loan campaign by using newspaper space for sponsored advertisements is being enlisted.

The Daily News is also in possession of suitable texts for such advertising in case business people desirous of taking part have no particular ideas of their own.

We are ready to assist in suggesting both illustrations and messages but would suggest quick action. Already we have had several orders for space during the campaign.

Telephone or call at the Daily News Office.
