Interior-1942 Was Good Year

District Agriculturist S. G. Preston, of Smithers, in a report on 940,000 square miles, almost fouragricultural conditions in Central fifths of it covered by water. British Columbia, states that there was an excellent growing season in 1942 with harvesting of abundant crops of all farm commodities except potatoes, a crop which proved below normal due to excessive cold rains in the spring.

The chief cash crop in and around the Bulkley Valley was timothy seed, of which there was an increase again in tonnage over the previous year. The current orice, however, was substantially

Mr. Preston's reports for the past six years indicate that livestock raising is increasing at a rate of 10 per cent each year. This would appear to be a very healthy trend and the additional cash brought into the district through the -sale of livestock and milk should eventually bring stability and prosperity to the farmers of the area. The war, however, may retard this development as there is a serious shortage of farm labor.

District Agriculturist S. G. Preston has been active in organizing and expanding the formation of boys' and girls' farm clubs. This club work is sponsored by the federal and provincial governments as a means of giving the farm youth valuable knowledge of and interest in farm life.
