#### For Our Sons . . .

One of these nights soon, when darkness cloaks the enemy shores, our sons will be peering into the gloom, waiting nervously for the whispered signal to attack.

Our sailors will be there, manning the invasion fleet, ready for the screeching, diving enemy bombers. Our fighter pilots will be dressed for battle, ready for the grimmest test of air strength the war has yet developed. by the ladies of the United Church "By the way my sailing days with

Our boys who, not so long ago, sang in Sunday school, poked nickels into juke boxes, sat on the store steps on Saturday nights, fixed the broken board in the cottage dock, and walked arm in arm with the girl from a movie, are face to face now with death.

While their hearts and minds and bodies are steeled to the job of wiping out the cruel foe, does anyone believe for a moment that in that hour of waiting they will not be thinking about the scenes of yesterday?

Fully aware of the danger they face, that this great adventure may bring them to the end of the road and a long a period. Let's make the Fourth Victory Loan a rousing cheer for our boys overseas, a message of encouragement to them at the hour of attack!

#### Improving Food Supply...

Dehydration of fruits and vegetables, of eggs and other other food products has reached a new high in this war. Refinements have been made in dehydration which make dried vegetables taste like fresh when cooked. Dehydration is a process of drying fruits, vegetables and some other foods. In the old days when they dried apples down Ontario way it wasn't very satisfactory, although those dried apples were filling when fresh apples were not to be had during the spring months.

The new method has put dried fruits and vegetables into a brand new niche in the housekeeper's food list. By the new method fruits and vegetables are said to retain their flavor and vitamins, and it is being predicted that a can of dried egg powder will, after the war, be as common in the home pantry as the flour bin. Right now all our dried eggs are being exported to Britain.

New type dehydration plants are in operation now at several points in Canada and more are in process of formation. One pound of dried fruit, or vegetables, we are told, takes the place of 10 pounds of the original and comes back to the original amount when water is added for cooking. Imagine what that will do in the way of providing a market for vegetables as well as fruits.

HELPING WAR EFFORT

Editor, Daily News:

If the editor prints this good and well. If he throws it in the wastepaper basket good and well.

Some of the people seem to take a delight in blowing off at the mouth about conditions and the buying of bonds. Not only do they not buy bonds but also, they don't make much effort to help in other matters. All they do is sit down and criticize the other fellow when they themselves should be up and going. They should get it into their heads and realize that, through the other fellow buying bonds and through the government spending it on war work, they are receiving the other fellow's money indirectly. Not only are they receiving it but the other fellow is also helping to pay them for sitting down on the job and "beefing." "Yes, "beefing." That's the word for it. These people should be very much ashamed of themselves. I wonder! We salvage this and we salvage that. But wasted money in this respect should be salvaged too. It could be done, or will we leave it to "George."
