

The glorious victory of North Africa paves the way for the invasion of Europe — possibly the final phase of the whole war.

Tune In

Listen to CFPR each evening this week for Victory Loan talks by your fellow citizens.

Paced by the splendid Eighth Army, our forces and those of our Allies have routed the Axis in that sphere of the war.

In Russia, our friends are on the March of Victory from Leningrad to the Caucasus.

In Britain, our armies are poised for the big offensive.

Here in America—on this coast—we are gathering our strength for the attack on our particular enemy.

Our men are on the march.

Our workers are concentrating their efforts.

Our common job now is to speed the Victory.

Every day counts.

Are you helping with your dollars?

Are you putting every dollar you can into Victory and helping yourself to financial security after the war is over?

Buying Victory Bonds is not a duty. It is a privilege.
It is good business for us all.

Buying Victory Bonds is the easiest thing we can do.

Are you for any reason hesitating?

The boys may be home soon. Could you face them knowing that you had not supported them by buying Victory Bonds?

Turn Out

Turn out for the Victory Loan demonstration on Friday—Eighth Army Day.

Do you know that buying Victory Bonds might bring them home sooner—might bring more of them home?

Clinch a greater, a speedier victory, by buying Victory Bonds, as extensively as you possibly can.
