BUILDINGS

To ensure there being adequate stocks of fuel for next winter, the city is endeavouring to arrange for supplies of cord wood. In order to determine NOW what the probable requirements will be during the next 9 months, it is necessary that you forward the following information to the City Clerk:

- 1. Name and address.
- 2. Number of cords you will require to Feb. 28, 1944.
- 3. Number of cords you can store.
- 4. Number of cords on which delivery can be taken to July 31, 1943.

Prompt action is necessary NOW if you want to avoid discomfort and possible hardship next winter. Preference will be given to those filing information.

Write to City Clerk or phone 90. The responsibility is yours. ACT TODAY.

CITY CLERK.

Chiese Monght of it tirst:

HOUSANDS of years ago, the Chinese used a form L of gunpowder—a flaming chemical of defence dumped over battlements upon an invading enemy.

And from this age-old beginning has evolved smokeless powder made from high-proof alcohol. Like the airplane, it has done much to further the progress of mankind-but in evil hands it has meant tyranny and enslavement.

As the tempo of this war for liberty increases and our armed forces in all parts of the world swing to the offensive, more smokeless powder for our shells,

bombs, depth charges and torpedoes is a vital necessity.

And because we have vast fields of grain and the facilities to convert them into high-proof alcohol, the United Nations shall have an overwhelming superiority of fire-power to pulverize the enemy into unconditional surrender.

Thus, China's primitive powder of defence has finally developed into the weapon to drive tyranny forever from this earth. In a way, it is the hand of ancient China reaching out in defence of free men everywhere.

Alcohol for War is also used in the manufacture of Synthetic Rubber, Drugs and Medicines, Photographic Film, Lacquers and Varnishes, Drawing Inks, Compasses and other Navigation Instruments, Plastics, Shatterproof Glass and many other products. Every Seagram plant in Canada and the United States is engaged 100% in the production of high-proof Alcohol for War.
