When the nurse came out with a big smile and said: "It's a boy," George could have kissed her. But later, when the doctor told him, with a grave face, that he couldn't go in yet, he sat waiting in a daze of fear.

Even when the danger was past and Ann came home with the "family," George kept talking of those awful minutes when he thought he might lose her.

"It would be worse if I lost you," said Ann, "and especially

"We'll simply have to save more, that's all," said George. "But how can we, with all these bills coming in?"

"We've got to, Ann. On top of our insurance we'll have to put more into war savings. I can't remember the marriage service, but didn't I say, 'To love, cherish . . . and protect . . . till death us do part'?"

THAT'S the way a family man feels. He doesn't worry much about his own future. But when it comes to the future of his loved ones—that's another story. That's the story of life insurance. It came into existence because men and women and children needed it. It grew because people had to have it. It's the people's business; they own its assets—over two billion dollars of them.

Life insurance has been wisely administered to provide quardianship for the people, by the people. It is an ideal form of co-operative effort. It's a romance, really—a thrilling story of how the people's dollars co-operate in a democracy of protection within our greater democracy. And now that our democracy is threatened, millions of dollars of the people's premiums are being invested by the insurance companies in Victory Bonds. Our ultimate protection now depends on that . . . on a final and conclusive victory.

IT IS GOOD CITIZENSHIP TO OWN LIFE INSURANCE
