

Triple Funeral On Winter Day

Local Business Man and His Brother and Sister Laid to Rest in Multiple Rites

BRAMPTON, Ont., March 18—It was a bleak, icy day in the depth of the most severe cold spell Ontario has had this winter when the triple funeral took place in his "Home of the Flowers City" of Jack Woods, well known Prince Rupert business man, and his younger brother, James Woods, and sister, Miss Sadie Woods. Jack Woods had passed away in Prince Rupert and within the same week his brother and sister also died. His remains were brought to the family home near by the widow, Mrs. Annette Woods, who has since returned to Prince Rupert.

Anyox Bride and Terrace Groom

Real Northern Angle at Wedding Here Monday Night

An Anyox-born bride and a Terrace-born groom were the principals in an interesting wedding with a real northern angle which took place quietly on Monday evening at the deanery of St. Andrew's Anglican Cathedral. Very Rev. James B. Gibson, the dean, officiated. Miss Shirley Inez Hague, only daughter of Mr. and Mrs. George Hague of Prince Rupert, became the bride of Able Seaman William Smith, third son of Mr. and Mrs. E. M. Smith.

The bride, who was given in marriage by her father, was charming in a floor-length gown of Wedgewood blue sheer. Her finger tip veil of matching color was held in place with a spray of pink carnations. The colonial bouquet was of pink and white carnations. The bridesmaid, Miss Pearl Menzies, was pretty in a floor-length gown of maize sheer. Her veil, extending to the shoulder, was held in place by a spray of yellow flowers. She had a colonial bouquet of iris and pink carnations.

At a reception which followed at the home of the bride's parents, friends gathered to extend congratulations and best wishes to the couple. A toast to the bride was proposed by Chief Petty Officer Percy Sweetman and was responded to by the groom. A beautiful wedding cake was duly cut.

GARDENING CHICAGO

In Chicago last year 8,105 families shared the products of 547 community war gardens.

Water Policy Is Reiterated

City Council Can Grant No New Connections Until Supply is Increased

The city council is still wrestling with the question of water supply pending something being done in the way of increasing the supply through installation of a booster pump or by some other means. Meanwhile no new water connections are being granted until such increased water supply becomes available. This policy was reiterated by motion of the council at its regular meeting this week. Ald. N. E. Arnold referred to some deplorable conditions which are existing because of lack of water supply.

Leather for heavy-duty shoes Catherine the Great of Russia comes from the hides of cattle first popularized sealskin for more than five years old. women's fur coats.

Traffic Bylaw Nearly Ready

Expected To Be In Shape For Presentation to City Council At Next Meeting

The new city traffic bylaw, which has been long in the making, is expected to be in readiness for presentation to the city council at its meeting next Monday night. Recently it has been under consideration of the chief of police and the city engineer with a view to embodying regulations relating to heavy vehicles. Between now and Monday it is expected these will be written into the new bylaw draft. Soaking of the matter of traffic regulations at the last meeting of the city council, Ald. Thomas Elliott took the view that it was high time military traffic particularly should be put in its place.

Cruise Ship Now War Cruiser

THESE "then and now" pictures show (below) the "Prince Robert," once famous Alaska cruise ship of the Canadian National Steamships, as she looked when in peacetime operation between Vancouver and Alaska ports, and (above) the "Prince Robert" as she is today—stripped of her luxurious fittings and converted into an auxiliary cruiser. The "Prince Robert," which was one of the fastest cruise ships in Pacific Coast waters, has been in war service since early 1940 when she was taken over by the Royal Canadian Navy. She won special distinction by the capture of a large German merchantman. The "Prince Robert" is one of a number of ships of the Canadian National fleet which were taken over for active war duty. These included the "Lady Somers," formerly in the West Indies service, which was sunk by enemy action in the Mediterranean in July, 1941. Another ship of the Company's fleet returned to her home base with more than a half-hundred bomb holes, or bomb splinters, in her hull. She had been bombed out of Penang and Singapore but at each beleaguered port had saved precious supplies from capture by the Japanese. After a job of temporary patching was done on her hull, she sailed for Africa with yet another war cargo, and, eventually, steamed northward to Canadian waters. The Canadian National Steamships also acts as agent for the Dominion Government in the operation of Axis ships seized as prizes of war.

PLAYGROUND SITUATION

To Be Discussed Between GYRO Club and City Council—Donation to Red Cross

The civic committee of the Prince Rupert GYRO Club together with Frank Skinner, chairman of the club's playground committee, will confer with a city council committee soon in regard to the condition of the various playgrounds of the GYRO Club some of which have suffered recently as a result of recent government and national defence contracting projects as well as by use of the military authorities. The plan is to effect a program of repairs on the grounds in the light of changed conditions. Meanwhile, the pipe fitters of the dry dock are planning a softball league and have requested the GYRO Club for permission to use GYRO ball park at the corner of Sixth Avenue and McBride Street twice a week. The playground situation was among matters taken up at the regular monthly business luncheon of the Prince Rupert GYRO Club yesterday. The GYRO Club has also endorsed a resolution of the Teachers' Federation advocating the provincial government assuming entire responsibility of financing education, a clause respecting teachers' salaries which had been included in the same resolution being, however,

WARNING

CANADA FACES A WOOD-FUEL FAMINE NEXT WINTER

ARE YOU one of the Canadian householders who burned fences, doors, and even flooring to keep warm in this winter's sub-zero weather? Or perhaps you are one of the lucky ones who just managed to scrape through?

In either case, you will want to be prepared for next winter when greater hardships loom unless you take immediate action.

The shortage already has affected many communities . . . total stocks of dry wood are nearly exhausted . . . in some places the small supply of green wood cut for next winter is being used now to meet the present emergency.

Throughout most of Canada, fuel-wood is obtained not far from where it is consumed. Its production and distribution are the business of local citizens.

The Dominion Government recognizes that the wood-fuel shortage is so serious that even with the full co-operation of everyone in affected communities an adequate supply is not assured. Accordingly, it has been decided to stimulate the output of wood-fuel by assisting those normally engaged in its production and distribution. To this end the following measures will be adopted:

- 1 A subsidy of \$1.00 per cord will be paid to dealers on all commercial fuel-wood contracted for and cut on or before June 30, 1943, and held to dealers' account on that date
- 2 The Coal Controller has been authorized to arrange in his discretion for the payment of such portion of the transportation costs as he considers proper in respect of fuel-wood, particularly in cases where dealers, to procure supplies, find it necessary to contract for fuel-wood at locations outside the area from which they normally derive their supplies. In order to obtain any such reimbursement, dealers must obtain a permit from the Coal Controller before contracting for such supplies
- 3 The Coal Controller will repurchase from dealers at dealer's cost all commercial grades of fuel-wood on which a subsidy of \$1 per cord has been paid and which are still in dealers' hands as at May 31, 1944.
- 4 Assistance will be given in providing priorities for necessary equipment.
- 5 Farmers now on the farm and who leave the farm temporarily in response to this appeal to engage in fuel-wood cutting, will be deemed by National Selective Service to be carrying out their regular occupation as farmers and will be given all the rights of deferment of military service which such an occupation now carries. Such temporary absence should not, however, interfere with agricultural production.

Municipal councils, farmers, fuel dealers, individual citizens, service clubs, and all other groups in communities where wood-fuel is burned are urged to begin at once a rapid survey of their local situation, and to take immediate action to relieve the shortage.
