XXXV, No. 58.

VICTORIA (CP) — Just before the debate on the address in reply to the Speech from the Throne concluded in the Legislature yesterday, Minister of Public Works Herbert Anscomb announced the greatest road building program in the history of the province of British Columbia.

Geatest Road Building Program in History

of Province Is Announced in Legislature

Referring to the road built by the Dominion government to link Prince Rupert and Hazelton, Mr. Anscomb said he was in favor of the national government maintaining the road itself as a military highway in the same way as the Dominion government is maintaining the Alaska Highway.

"Both were built for that purpose and both, I maintain, should be national responsibilities."

Of particular interest to the northern part of the province was Mr. Anscomb's statement that the federal government had been approached concerning the construction of a road to link Atlin via the Alaskan Highway with Whitehorse. A reply, he said, had been received that the Department of Mines and Resources was quite favorable to the project "and the project should be approved. It is quite possible the Dominion government will undertake all the work, including surveys, with our province contributing its share of the cost of the work."

HOW MONEY IS TO BE SPNT

With public works department expenditures for the 1946-47 fiscal year totalling \$22,850,000, Mr. Anscomb outlined the great program, summarizing expenditures as follows:

. Maintenance, \$5,000,000.

2. New loan for capital development, \$5,000,000.

3. For machinery and equipment, \$5,000,000. 1. Completion of contracts already entered into.

\$600,000 (approximately). 5. Kootenay Lake ferry road and landings,

\$750,000.

6. Peace River road connection, \$6,000,000. 7. Hope-Princeton road, \$5,000,000.

The minister predicted that the public works department is planning to tighten up "very considerably on gross loads carried on highways by trucking operations."

During the war, Mr. Anscomb said, "we allowed heavy overloads because of the necessity of the times. Whether that necessity has passed completely or not, the fact remains we are going to restrict them because the roads were never constructed for the loads now being placed on them and they are wrecking the roads so fast without additional compensation that it has got to stop."

The minister indicated that tolls would not be removed from ferries, bridges and highways. He said that the tolls collected from such ferries, roads and bridges represented \$600,000 a year which would hard top 100 miles of road.

Mr. Anscomb said, however: "I want it very clearly understood that, whatever I say about them does not mean that, under ordinary circumstances, I am personally in favor of a toll."

The minister recalled that on one occasion in Wilson. the Legislature he had remarked that, when the federal government relinquished its present threecent gasoline tax, the province should impose it." In other words the tax would then remain as it is--10c per gallon—and we should definitely earmark it as a carrying charge for public works loans."
