Cooking is really a pleasure on an electric range.

There's no need to worry as to how baking and

roasting will turn out, thermostatic control of

heat eliminates tiresome peeks in the oven which

take up valuable time and mean many trips to

the kitchen. Electric cooking is clean cooking. An

electric range cannot create soot or smoke to

stain its shiny enamelled surface or blacken pots

and pans. Furthermore, the kitchen does not get

overheated with electric cooking - and that is a

blessing any time of year!
