## Time for Conference

**MATTH SEPARATE TAXATION agreements now** W arranged between Ottawa and four of the provinces, the time is undoubtedly becoming for another Dominion-provincial conference. cannot, of course, be satisfactory for some of the provinces to be running along on temporary agreements, no matter how satisfactory they may appear to be in individual cases, while with other provinces there are no agreements at all. The situation from a national standpoint that way can be only the more aggravated. Ottawa no more than the outstanding provinces could be satisfied there-

There are important outstanding matters between Ottawa and the provinces to be ironed out before Canada can go steadily into matters of economic and social import. Only by a conference, with spirit of understanding and compromise, can these matters be permanently settled. Provinces like Ontario and Quebec, as Ottawa will itself, must be prepared to be reasonable.

RAILWAY FARE FOR CHRISTMAS

#### Fifty Thousand Pounds of Turkey-31/2 Tons of Plum Pudding

MONTREAL- Fifty thousand pounds of turkey and three and a half tons of plum pudding will be served to patrons of Canadian National Railway's dining cars, cafe cars' and station restaurants over the Christmas and New Year's season. The Christmas pudding was made in the kitchen of a C.N.R. commissary car here by Fred Conway, chef-instructor. Housewives have always been interested in the recipe used. Principal items in the three and half ton pudding, were: 1500 bounds of raisins, 950 bounds of currants, 480 pounds of mixed peel, 270 pounds of mixed fruit, 225 pounds of suet, 90 dozen eggs, ten pounds of ground nutmeg, 12 pounds mace and 20 pounds each of ground allspice, cinnamon and ginger.

Everybody loves slippers. We've a tremon collection of the newest and latest style everyone in the family.

The way things stand now, almost ten years have elapsed and we are little, if any, further ahead in Dominion-provincial relations than we were when the Sirois report first came out and the abortive conference following thereon was held.

Hooper rating of radio programs show a decline to 10.8 million listeners for the highest listenership in 1946 compared with 23.7 in 1936. In addition, in 1936 eleven other shows rated above 10 while now only one other show was in that category.

### **Television in Canada**

ELEVISION for Canadians, beyond mere generalization, is the exclusive property of the radio engineer and student of science. As a topic for discussion it has cropped up periodically for more than a decade but at all times it remained just that.

Only a few days ago A. D. Dunton, chairman of the board of governors of the Canadian Broadcasting Corporation, said that the board "has decided that studies should be made of the possibilities of establishing publicly-owned television facilities in Montreal and Toronto". Both in the United States and the United Kingdom television, to a limited degree, has become public property. In the U.S., and especially in New York where there are upwards of 2,000 receivers in operation, there is talk already of a network. In the U.K., perched high on Highgate hill in North London, Alexandra Palace long has been known as the centre of television experimentation and broadcast For Canadians, however, television still means something to read about and discuss since television reception is possible only in areas where television broadcasting takes place. In Canada there is no television broadcasting and for that reason there are no television receivers. None will be bought until such time as someone establishes a broadcasting field where there is no audience. Nevertheless a television broadcasting station in Detroit is directing programs to Windsor. Some television receivers undoubtedly will be in operation there. Perhaps, if there are enough of them

Hotel Fires

**NESPITE** recent demonstrations that hotels can be deathtraps, fire insurance underwriters generally consider hotels a good risk and back up that belief with a premium rate little higher than for private homes, considerably lower than for factories, says Financial Post.

Hotel fires, they point out, are rare; hotel fire deaths and

injury rarer still. Well under 1% of Canadian fires occur in such establishments. But this observation, the same insurance men are quick to add, doesn't apply to the substandard hotel.

Just what constitutes a "fireproof" building isn't clear, even to rank and file insurance authorities. Most consider the word a misnomer, though it is a generally accepted term

For ordinary purposes, a building is called "fireproof" if its frame floors, walls, partitions, ceilings and roof are of fire "resistive materials."

Fire preventative and protective devices most often mentioned as effective are (a) automatic sprinklers, and (b) thermostat - controlled alarms on all floors and which sound loud warning if heat rises above safe temperature. But nothing much has yet been widely applied to lick the smoke hazard; when upholstery smokes it sometimes smothers. even without much of a blaze.

Fortunately for travellersand as reflected in relatively low hotel fire insurance rates -strict bylaws regulate hotel
