Let's Do Something

It is a pity indeed that a tragedy had to intervene before we could get around to doing something about providing the worthy pioneers of Prince Rupert with something better than the hovel which they have had to put up with during the past several years and which was finally destroyed by fire yesterday. Possibly, Bert Johnasen and David Robertson might have been still alive had it not been for yesterday's conflagration. However, this is beside the point. The thing now is to implement the objective which we have long since agreed upon and for which we have already laid aside a substantial fund - namely the provision of our pioneer citizens with a decent and comfortable home for their declining years. We have no Pioneers' Home at all now and something has to be done about it. It is to be hoped that we will not be satisfied with some other poor makeshift accommodation, but that something really adequate will be provided without any further delay. If we judge public feeling aright, that is the unanimity of desire even if another financial effort may have to be made to finally effect it.

"Franklin Roosevelt" Park

It is a happily appropriate idea and one of which we thoroughly approve to change the name of the dominating high point of Prince Rupert's topography from the ancient Greek "Acropolis Hill" to modern American "Franklin Roosevelt" Park. There need be no jingoistic qualms about it. That part of the city will always be associated in history with the presence there of the American forces in the Battle of the Pacific and, as time goes on, it may be expected to become a sort of mecca for our tourist visitors, the great majority of whom come from the United States. For them there will be the sentimental interest in seeing the actual spot where so many thousands of their men lived while "overseas." And, apart from that, of course, it is the vantage point of the entire city from a view and scenic standpoint.

With the renaming, the city assumes the responsibility of assuring that "Franklin Roosevelt" Park

is maintained as a fitting and creditable memorial. It would be a hollow honor to the great President if it were allowed to deteriorate into a dilapidated eyesore. On the other hand, it could and should be developed into a place of lasting beauty as well as practical utility, creditable to the community and honorable to the commemoration of the great name which it has now been seen fit to attach to it.

Keep Up the Fight

The campaign for better utilization of the Prince Rupert dry dock now that the war is over, than seems presently planned has reached a disappointing position, due to the obdurate refusal of the authorities in control to even make a statement of policy on the matter, where it might be very easy to follow the line of least resistance and give the whole thing up. The fact remains, however, that, if we ever did have a case in this matter, we still have it and the mere fact that we have not been making very much progress in achieving the desired end should not cause us to throw up our hands.

We have been showing the powers that be of late that we are very enthusiastic and on our toes. This is no time for weakening. There is certainly nothing to be lost by continued agitation. The surest way to lose out is to give up the fight our-

We Build Again

The welcome sound of civilian construction work is being heard in Prince Rupert again. The chug of the compressor and the grind of the rock crusher are like sweet music to our ears. From across the street, where they are starting a new business block, we hear it in our editorial rooms at the Daily News office. There was plenty of such noise during the war years but this is much more pleasing now because it is permanently constructive, designed to last in the pursuit of peaceful trade and business.

Here and there around the town the odd new home is being built and, as soon as the materials become available and things get a little more settled one way and another, there will be more residential as well as the business building. Many projects are in mind and will soon be in hand. They indicate the confidence of people in Prince Rupert. They are an earnest of good faith and permanence of spirit.

Construction work is always an important factor in community prosperity. It is to be anticipated that plenty of it will be seen in Prince Rupert before long. It will be one of the healthy marks of our reconversion.

ROTARIANS SEE PLYWOOD FILM

Prince Rupert Rotary Club went into the woods, felled giant Douglas fir trees, followed them to the mill and through the processes of ply-wood manufacture, then put the plywood to use in home construction via the medium of a film shown at its weekly luncheon meeting Thursday afternoon. The color film, taken in the Pacific Northwest contained georgeous shots of the natural beauty of the area, as well as interesting industrial processes. It was shown by D. Dixon of the Indian Department. Guests at the meeting, welcomed by President James H. Thompson, were W. J. Alder and Harold Alder of Victoria, Mr. Collins and Mr. White of Vancouver, and Olof Hanson, Smithers.
