Not Only a Word, But a Code

Quality is no static thing; it has no unit of measure. Rather is it a decree of excellence.

. . Judgment of the degree of excellence in any particular product must rest with the integrity of the judges.

. . . Such judgment was easier when things were made of "pure" substances-such as pure wool, pure silk, pure linen-or when an article was made from start to finish by hand.

... Proper judgment of products demands more knowledge and experience than ever before. Only a store that holds public confidence as its most precious trust can be counted upon to keep its standards of judgment unassailable.

... Quality is and will continue to be our code. We will endeavor to maintain in our goods a degree of excellence the word "Quality" connotes.
