Not Only a Word, But a Code

. . . Quality is no static thing; it has no unit of measure. Rather is it a decree of excellence.

. . . Judgment of the degree of excellence in any particular product must rest with the integrity of the judges.

. . . Such judgment was easier when things were made of "pure" substances-such as pure wool, pure silk, pure linen-or when an article was made from start to finish by hand.

... Proper judgment of products demands more knowledge and experience than ever before. Only a store that holds public confidence as its most precious trust can be counted upon to keep its standards of judgment unassailable.

. . . Quality is and will continue to be our code. We will endeavor to maintain in our goods a degree of excellence the word "Quality" connotes.
