—until his mother did this!

• His meals were deficient in important food elements needed for health and appetite. He wouldn't eat, became thin, nervous and below par. Then his mother learned about Ovaltine which provided these necessary food elements in delicious form

-soon his zest for meals returned-and look at him now! As a "protecting" food-drink, Ovaltine adds to a child's meals essential food elements most likely to be lacking. Ovaltine is thus an insurance against those food deficiencies that retard normal growth and development.

Ovaltine food-drink is an excellent source of the Vitamins A, B1 and D. It also contains almost all of the precious food elements necessary for health and top vitality, especially those needed for vitamin teamwork, such as calcium, phosphorus, iron, protein and fuel-food elements.

Three servings of Ovaltine furnish a significant portion of a child's daily requirements of these essential food elements needed for building sturdy bodies.

So—if your child eats poorly, is thin, nervous and under par, why not start giving Ovaltine regularly. Get Ovaltine today at your drug or food store.
