NOTHING but milkgood whole milk with only part of the natural water taken out, and all the food value left in-Carnation's a very fine milk for babies.

There are three big reasons ... First, it is as nourishing as milk can be - and provides extra "sunshine" vitamin D to help build bones and teeth. Second, it's safe, because it is sealed and sterilized . . . keeps indefinitely in the unopened can. Third, it's readily digestible because heat-treatment makes it a soft-curd milk.
