Born to a Quaker family in a little thatched

cottage in England in 1766, John Dalton ac-

quired enough education at twelve years of

age to start a school of his own. He began to

take regular weather readings and was noted

for his ability to predict the weather. He

studied flowers and insects, optics and color-

blindness, and finally decided to make chemis-

try his life work. He noted the constant pro-

portions in which different elements combine

with one another, and finally established the

atomic theory in chemistry.

### NEW POWER AT TERRACE

Start Being Made on Rural Electrification of District

TERRACE, Sept. 17 - G. A. Vandervoort, engineer with the B.C. Power Commission, has been in Terrace during the past week in connection with the installation of the new power plant for Terrace and district. Due in part to his efforts, the people whose electricity was cut off by the burning of Gordon Kerr's plant a month ago, will once more have electric lights. Under his supervision, a temporary plant is being erected Executive Committee-Dr. L. diesel units are being installed. The Power Commission is to that a provincial commission will
