Connecting Link Between Central British Columbia and Present Road Is Essential, Declares Engineer

For almost a half century the project of inter-continental transportation between North America and Asia has been thwarted, writes Donald MacDonald, former member Alaska Highway Commission, in Mindates numbering 1675 have been ing World. While the tremendous scope of the ideanominated for 600 seats in the the tying together of the peoples of almost the entire world with connected, impreg-

nable, efficient land transportation-has challenged the imaginations of czars, philosophers and construction financeers; while the construction obstacles were well within the range of engineering science; ject was blocked by international conspiracy - stupid, destruc-

tive, obstructive and blind. States, through the machina- that if this great project had tions of the state department, been built at that time it is quite blocked even the powerful figures of the 1900's-the Czar of Russia and the great longvisioned American financier E. H. Harriman.

Even as late as 1937 it appeared that President Roosevelt and Premier Pattullo were agreed that construction should start at once on the Alaskan International Highway to extend only to Fairbanks, Alaska. The Japanese. perturbed by the imminence of the project, secured the aid of the "great appeaser," Cham-

berlain, then interdicting the construction of such a highway through Canada.

Through the press the Japanese made almost hysterical protest against construction of this while the potentialities of the highway to Fairbanks. To them geo-politician in 1870, the pro- tullo, the highway was not started then.

The tragedy of the denial of the effort of E. H. Harriman possible that the war would not have occurred.

The existence of such transportation, had it been built, would have meant the possibility of concentrating the great force of the industrial power of the U.S. on the problem.

Both Japan and Germany gambled that the submarine would be equal to the destruction of the American effort. We know how close they came to being right. But had there been efficient, impregnable land
