"We are forced . . . to destroy its weapons by the practice of the principles of its own philosophy of life. In the terms of practical application of these German principles there can be only one postulate: to return the German nation to what it was before the war of 1864, perhaps even to what it was at the time of the Vienna Congress of 1815."

This plan would not necessarily mean the dismemberment of Germany into the hundreds o tiny states which existed prior to Prussian expansion, the author points out.

"It would simply mean the abolition of a concentrated power consisting of the southern German Catholics and Protestant Prussians, of the industrial Ruhr population and the East Prussian land-owning stock. Only by way of elimination of the Prussian hegemony and domination over the rest of Germany, by offering all sections of Germany their former liberty and freedom o action, by letting them decide their own fate and future, can this be realized."
