Vancouver Plant of Assembly Re-opening

HAS LONG BEEN POPULAR CAR IN PRINCE RUPERT DISTRICT

VANCOUVER-Reconversion operations at the Ford Assembly Plant in Vancouver which was returned to the Company by the Army late last summer are now nearing completion, Ralph K. Johnson, Vancouver Branch Manager of the Ford and Monarch Division, said today when commenting on the ap-

pointment of Bob Parker Ltd. as their dealers at Prince Rupert. Production machinery and assembly lines which were removed to provide room for army repair depots when the plant was released to the armed services early in the war have been reinstalled and the plant is practically ready for operation. Actual assembling at the Vancouver plant will be delayed until there is an improvement in the general steel situation.

Re-opening of the assembly plant will help boost Ford production by relieving the main Ford factory at Windsor, Onfario. Vehicles supplied to Britsh Columbians last year were thipped direct from Windsor. Ford is the only automobile manufacturer to assemble in this province.

The parts depot will also be re-opened early in 1947 enabling dealers to secure genuine Ford parts promptly when needed.

The information was given by Mr. Johnson in announcing that Ford cars and trucks, including the new Monarch and the revolutionary Ford Tractor Ferguson system, will be sold and serviced at Prince Rupert by Bob Parker Ltd., who have recently taken over the business of S. E. Parker

We welcome Bob Parker Ltd. s an authorized Ford and Monarch dealer," Mr. Johnson said. We have been particularly fortunate in having Stan Parker represent us in Prince Rupert. Sian Parker has been a Ford dealer since May 1 1,923. By conucting his business in a straightforward, efficient man; ner, he has earned for himself a very favorable spot in both the business and community life of Prince Rupert. Now with his son. Bob, taking over the business, we look for a continuation of the same friendly, conscientious service to the motoring pub-. Owners of Ford products can drive into Bob Parker Ltd. with every confidence that they will receive automotive service to

their satisfaction. "They waited a long time until been more Fords purchased in line of Imperial Oil products. Parker Ltd. their names came to the top of the Prince Rupert district than were at the head the list," he said. "However, I any other make. LIMITED

of Prince Rupert

Nothing is finer, nor more progressive and deserving of community praise than a Father-to-Son business. Along with "Bob Parker Limited" comes a newly established Ford and Monarch Dealership and Gutta Percha Tire Dealer franchise.

The old and the new are milestones of achievement—and we extend every wish for continuous success to the management of this expanding enterprise of Prince Rupert.

principle, it works in the same way as the vacuum bottle you take on a picnic. The cold air outside can't cool down the air inside and thus it can't cause moisture to form.

The ignition system in the new 1947 Fords has been improved in other ways, too, Mr. Parker adds. Synthetic rubber has been used on ignition wires for insulation because it won't crack in extremely cold weather and is oil resistant. This idea came out of the use by high-altitude airplanes of synthetic rubber insulation.

Water splash from wet roads can't stall the engine because new plastic sleeves tightly seal the ignition wires.

And the problem of ignition under the attack of ozone gas When moisture forms in the which is formed by the highdistributor, it causes hard start- voltage current of the ignition ing. Ford engineers designed a system, has been solved by the
