SHIPS and— WATERFRONT

Two Union Steamship Co. liners were, as usual, Sunday evening visitors in Prince Rupert. The steamer Coquitlam, Capt. William McCombe, arrived at 6:35 p.m. and sailed at 11 o'clock for Port Simpson, Alice Arm and Stewart whence she will return here tomorrow morning to sail at 1:30 p.m. on her return south. With a group of 69 loggers on board heading southward from the Juskatla camp in Massett Inlet, the steamer Camosun, Capt. Harry McLean, arrived in port at 8:30 p.m. and sailed at

10 p.m. for Vancouver and way-points.

Fair hunting, if not spectacular, was obtained by a party of doughty local nimrods which returned the middle of last week from a five-day trip to those favorite haunts of Hartley Bay, Gilteas and Kildaia. The party consisted of Skipper Bill Husoy on the Fredella, Joe Scott, Jack Lindsay sr., Jack Lindsay, Jr., Jarvis McLeod and Sam Haugen—no group of tyros in the hunting game to be sure. The bag consisted of twelve geese and forty ducks. Weather: mild, calm and pleasant.

After unloading a shipment of materials for the city and Port Edward, the B. C. Steamships freighter Alaska Prince took on a load of canned salmon at the C.N.R. docks and left for Vancouver Sunday night.

C. P. R. Steamer Princess Norah, Capt. Graham Hughes, slid into C. P. R. docks here on time at 2:45 p.m. Saturday enroute from Skagway to Vancouver. Leaving at 4 p.m., passengers from here for the south included Mr. and Mrs. Martin Van Cooten and infant, Mr. and Mrs. E. Peterson, A. Hambleton, J. Gendie, A. D. Lawrence and M. Gilke. Arriving were Miss Rice, from Juneau; D. J. Harley, from Skagway and M. Stanley from Juneau.

60 YEARS OF ACCOMPLISHMENT

1889 1949

In early days, cream was skimmed from the top of milk left standing overnight in pans in a cool, deep cellar. Or cans of milk were immersed in cold water from the well or spring. When the cream had risen to the top, the milk was drained out of the bottom of the can leaving the cream, which was then churned in a dash churn or barrel churn. Today in modern dairy plants no care or expense is spared in protecting the purity of milk, cream and other dairy products. Nickel alloys are used in pasteurizers, coolers, bottling machines and other equipment, because these alloys are corrosion-resistant and easy to keep clean and sanitary.

Canadian Nickel sold Abroad brings in U.S. Dollars

Since more than ninety per cent of the Nickel produced in Canada is sold to the United States and other countries, it brings a constant flow of dollars back to Canada. In fact, Canada's Nickel industry is one of our chief sources of U.S. dollars so essential at the present time to maintain our foreign trade and make available products not produced in this country.

These dollars help pay the wages of the 14,000 Nickel employees, and help provide the dollars which make it possible to pay millions in freight to Canadian railways, to buy timber, steel, coal, machinery and supplies amounting to many millions each year.

These millions, flowing into all industries through the length and breadth of Canada, help create jobs for Canadians.
