DIDN'T I TELL YOU?
You get 50% MORE
Jam or Jelly with
CERTO

AND RESULTS ARE SURE!

Sounds almost unbelievable—until you know the reasons why. Certo is nothing but "fruit pectin"—the natural substance in fruit which makes jams "jam" and jellies "jell." It's extracted from fruits in which it is most plentiful for better, quicker, easier jam and jelly making.

1. Short boil — That's why, when you use Certo, you don't have to "boil down" your fruit to make it set. A one-to-two-minute full, rolling boil is enough for jams... a half-minute-to-a-minute for jellies.

2. Extra yield — The short Certo boil saves all the precious fruit juice which, in long boiling, goes off in steam. You get an extra yield of 50% more jam or jelly.

3. Saves time, work — What a lot of time and work it saves, too! The old long-boil way you'd have to boil and stir many times as long.

4. Fresh fruit flavour — colour — With Certo you use fruit at its peak of flavor and colour and not the under-ripe fruit used in long-boil recipes. The Certo boil is too short to spoil this lovely taste and colour. They stay right in your jam or jelly.

5. No failures — You'll have no failures if you follow exactly the recipes provided with Certo. Different fruits need different handling, so there's a separate tested recipe for each one.

A pound of jam or jelly made with Certo contains no more sugar than a pound made the old, long-boil way.
