GUIDES PLAN 'COOKIE DAY'

Prince Rupert Girl Guide Association is laying plans for the observance of Boy Scout and Girl Guide Week, February 15 to 22. Among plans being considered is that of a "cookie day" corresponding to Boy Scout "apple day" during which cookies may be sold on downtown streets as a fund raising project. It will be the first time such a project has been used in Prince Rupert. There are two Brownie packs in the city—The Girl Guide companies and three First Cathedral and Second First Cathedral, First Catholic Catholic companies and the and Second Conrad Street packs.

JANUARY WAS WARM MONTH

Weather in Prince Rupert in January was brighter, wetter, and considerably warmer than it was in the first month of 1947, according to the monthly summary issued this morning by the Digby Island meteorological station.

With an average temperature of 37.7 degrees and a minimum of 29 degrees, Prince Rupert was probably the warmest city in all of Canada during January.

Certainly, it was warmer than was January, 1947, when the temperature dipped to three degrees below zero. Minimum temperature last month occurred on January 2, the day that the city also received its heaviest snowfall.

During the month there were 25.2 hours of bright sunshine, as compared with 10 hours in January, 1947 and 18.32 hours in December.

Precipitation totalled 13.31 inches, as against 19.9 inches in December and 10.63 inches a year ago. There was 11.9 inches of snow, which melts down to 1.19 inches of moisture. Rainfall during the month totalled 12.06 inches.

Barometric readings showed a high of 30.44 inches on January 8 and a low of 28.44 inches on January 1.

The wind reached a peak velocity of 48 miles an hour on two occasions—January 5 and January 9.

How Deafened People Now Hear Clearly

Science has now made it possible for the deafened to hear faint sounds. It is a hearing device so small that it fits in the hand and enables thousands to enjoy sermons, music and friendly companionship. Accepted by the American Medical Association's Council on Physical Therapy, this device does not require separate battery pack, battery wire, case or garment to bulge or weigh you down. The tone is clear and powerful. So made that you can adjust it yourself to suit your hearing as your hearing changes. The makers of Bel-tone, Dept. 22, 1450 West 19th St., Chicago 8, Ill., are so proud of their achievement that they will gladly send free descriptive booklet and explain how you may get a full demonstration of this remarkable hearing device in your own home without risking a penny.
