## New Business

**A**FTER YEARS OF TALK and advocacy about the strategic advantage which Prince Rupert has to offer as the logical port connecting Alaska by rail with the United States, it is satisfactory to see this week that something more, real and substantial, is happening about it. This is the inauguration, as referred to in our news columns today, of a tug and barge service which will bring at regular intervals of possibly about ten days some half a million or more feet of spruce lumber from a large Juneau sawmill to this port for bonded shipment by rail from here to the Eastern States.

It is easy to picture that this may be but the starting of a very large volume of traffic in another of Alaska's important natural products. We are all familiar with the large utilization of this port in the handling of Alaska fish products for transshipment to the United States, a business which has increased greatly in volume even in recent years. Possibilities of expansion of the lumber traffic may be even greater, even to the point of taxing our facilities to handle it.

So the initial shipment of Juneau lumber due here tomorrow is something of more than usual significance.

Canadian National Railways officials are known to have been active in connection with lining up the organization for this new traffic for their Prince Rupert line and, while for some reason or other they have been rather chary about saying much about it, we think they are deserving of some commendation for getting the business.

## BOLIVIA'S REVOLUTION

**W**ITH THE SOVIET Fifth Column obviously active throughout the world, it is quite believable that the bloody leftist revolution in Bogota, Bolivia's capital, was Communist-engineered and, as suggested from Asuncion, Paraguayan capital, where a similar coup was put down, timed for the occasion of the Pan-American conference. No doubt it was a part of the present "cold" war which the Soviet is waging upon the United States. Of course, this time it was not so cold. It was a hot war, in perfect keeping with the Russian campaign to foment civil wars and keep countriesmen fighting with countrymen, brothers fighting with brothers, and the field well broken for the sowing of treacherous seeds of Russian Imperialism in the doubtful garb of Communism which some people, who know nothing about it and are actuated by propaganda, still think is good.

South America, which lent itself to Fascist philosophy could be expected to also be tempting ground for the Communists, equally as clever and equally as cunning.

No doubt, the Communists in Canada would try the same thing on but, fortunately, they are not strong enough, to date at least, to dare.

## INFALLIBILITY OF JUDGES

**C**OMPLAINT has been made by a federal cabinet minister that press criticism of the judiciary may weaken respect for the administration of law and bring the judiciary into contempt.

The minister, Mr. Isley, seems to proclaim, by implication, a new doctrine, the infallibility of judges, and to threaten with excommunication all editors who do not subscribe to it.

Even the judges, whatever may be their private opinions, have not gone so far as to proclaim their infallibility. Members of the bar, when they lose a case, do not invariably praise the judge for his legal acumen, while behind the courteous language in which a court of appeal reverses the judgment of a lower court one may sometimes discern an opinion of the trial judge's ability that is not essentially different from that expressed privately by the lawyers who brought the appeal.

Life might be a little simpler if there were infallible judges, whose decrees would be accepted without criticism by everyone. For practical purposes, the highest court of appeal before which a case can be brought must be treated as the ultimate repository of wisdom and justice. According to circumstances, this may be a provincial supreme court, the supreme court of Canada or the judicial committee of the Privy Council. Mr. Isley's doctrine does not take account of the fact that infallibility must be considered to be variable, if it is to conform with the reality of current practice.

Accepting the infallibility of judges, one must take a further step, the infallibility of the person who appointed them, whether it be Mr. Isley or one of his predecessors. Can Mr. Isley conscientiously maintain that all his predecessors shared with him in the divine gift?

The subject leads into fascinating bypaths of metaphysics, but none that leads directly towards a slavish worship of the judiciary. In fact, it may be concluded that the judiciary owes the general respect in which it is held to a general endeavor by its members to deserve it. To forbid criticism of a judge who appears to be in error would not assist in maintaining the public's regard for what he represents.

## LETTERBOX

### JUST DUST

Editor, Daily News:  
Between coughings and sneezings I take this opportunity of expressing my appreciation for your editorial "How About This Dust?" which was by no means "dusty" even though it was literally covered by Prince Rupert's Third Avenue. . . . And in further comment I beg to submit the following:

He who hath 'dust' to criticize the dust . . .  
The 'danged' dust we all do tread  
Through morning, noon and night; and thereby  
Helplessly help to dust the dust  
That whimsical weather  
Hurls and swirls almost unto our soul!

For years, Prince Rupert's cried for sunshine  
A respite from its weather's rain  
Yet now we hear, "Wait! one once,"  
When it doth rain and the whole day's rainy  
The dust will set, "Yah shure, by yim'ny!"

Complacent that it will rain again  
Thus causing the dust to "sit down" again  
"Why shure, it yust be yust t' ting; yah?"  
Or, shure as do the fish, do come again,  
With clouds of dust we'll be dusted again  
Till all that's not just dust in us  
IS dust, DUST, DUST!

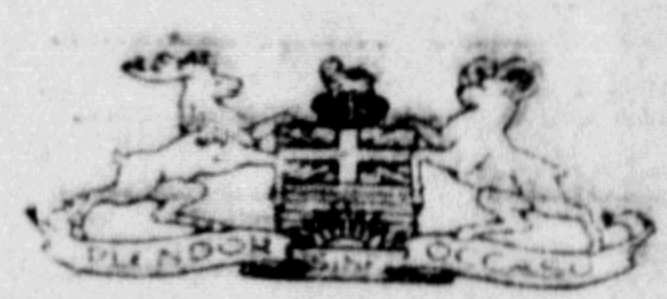

VIOLET INGALLS.

### Better English

By D. C. WILLIAM

1. What is wrong with this sentence? "The program was broadcasted from New York."
  2. What is the correct pronunciation of "chocolate"?
  3. Which one of these words is misspelled: Saxophone, sanatorium, seminary.
  4. What does the word "cogent" mean?
  5. What is a word beginning with os that means "to swing backward and forward"?
- ANSWERS**  
1. Say, "The program was broadcast." 2. Pronounce chok-o-lit, first o as in loss, second a as in no unstressed. 3. Saxophone. 4. Appealing forcibly to the mind or reason; convincing. (Pronounce the o as in no). "He presented cogent reasons for pursuing this particular course." 5. Oscillate.

GOVERNMENT OF THE PROVINCE OF BRITISH COLUMBIA  
DEPARTMENT OF PUBLIC WORKS  
PUBLIC NOTICE

Notice is hereby given that, pursuant to Section 34 of the "Highway Act," the following Regulation has been made by Order-in-Council No. 392, approved February 25th, 1948:

#### REGULATION 3A

- (a) No person shall operate upon any public highway any passenger vehicle that has a seating capacity of nine passengers or more, inclusive of the driver, or any vehicle having a capacity in excess of one-half ton of freight or goods, unless such vehicle is equipped with warning devices approved as provided in clause (c) and consisting of at least two flares, reflectors, fuses or red lanterns for the purpose of warning the travelling public of an emergency breakdown during darkness, and at least two red flags of a minimum size of 12" x 12" for a like warning during daylight.
  - (b) Every operator of a vehicle of a type referred to in clause (a) shall, when an emergency breakdown takes place upon a public highway during daylight, place two red flags upon the highway, one at a distance of approximately 100 feet in front of the vehicle, and one at a distance of approximately 100 feet behind the vehicle, and during darkness shall place two approved warning devices appropriate for use during darkness as provided in clause (a) upon the highway at the same distance in front of and behind the vehicle as aforesaid. For the purpose of this Regulation "darkness" means the period from one-half hour after sunset to one-half hour before sunrise and any other condition when there is not sufficient light to render clearly discernible a substantial object on the highway at a distance of two hundred feet and any object on the highway at the distance of the two hundred feet.
  - (c) Warning devices for use by night or by day shall be approved by the Minister of Public Works or by any person duly authorized by the Minister in writing.
- The above Regulation will come into force and effect on May 15th, 1948.

H. C. ANDERSON,  
Chief Engineer  
Department of Public Works,  
Victoria, B. C., April 1st, 1948.

## BIG SEASON FOR JASPER

**JASPER**—Harold Gunning, recently appointed manager of Jasper Park Lodge has arrived here to commence his season's work. Mr. Gunning, who has been assistant manager for several years, is well known to guests who have visited the Lodge from all parts of Canada and the United States.

"The coming summer would appear to be one of the busiest in the history of Jasper Park Lodge," he said on arrival. "Dozens and dozens of our regular guests have renewed reservations for this year and our big trouble is to find enough accommodation for those who wish to come."

"We will open the Lodge on June 11 to accommodate the annual meeting of the Canadian Feed Manufacturers and we expect a large number of guests to check in when the Lodge officially opens on June 15."

"The Canadian Rockies will attract great attention from all parts of the continent this year and Jasper will play a big part in assisting Canada's tourist problem," said Mr. Gunning.

Mrs. Ross Richardson returned on Saturday night's train from Montreal where she attended the funeral of her uncle, Dr. T. E. Donnelly.

Rintland, Prince Rupert; Mrs. E. Chaloner, Butedale; Mrs. S. deBucy, Queen Charlotte City; A. Yoxall, Terrace; T. S. Finnie, Vancouver; W. H. Sutherland, Vancouver; P. L. Johnston, Vancouver; Miss Jean Travis, Vancouver; A. Currie, Claxton; W. Bruce, Victoria; Mrs. A. E. Goodenough, Smithers; Mr. and Mrs. G. Reade, city; F. C. Fraser, Vancouver; E. Hickling, Quesnel; Mr. and Mrs. G. McAdams, Terrace; A. F. Cotterell, Seattle.

Mrs. C. D. Wallace, accompanied by her little daughter, Susan, arrived from their home in Port Hope, Ontario, by Saturday evening's train to visit with Mr. and Mrs. O. I. Smith, 309 Seventh Avenue East. Mrs. Wallace, formerly Miss Norma Smith, will be remembered by many friends in the city, having been a member of the King Edward and Seal Cove teaching staffs.

## TERRACE SCHOOL BOARD MEETING

**TERRACE**—At the regular school board meeting last Tuesday evening, the most important item dealt with, other than routine business, was the consideration of the number of new pupils that could be expected at the beginning of the fall term. All beginners reaching the age of six years by the end of September must be registered at the school board office before July 1 in order that the school board may know if an additional teacher will be needed at Terrace at the beginning of the fall term.

Another item was a proposal that school grounds be fitted with a number of pieces of playing equipment for the children. The action of the school board was to establish these items at the various schools along the line where they have not such equipment.

Report of the various committees—education, transportation, buildings, grounds and finance—showed that the educational program is proceeding satisfactorily.

Plans for new buildings and alteration of present buildings are being proceeded with as rapidly as possible.

WALK UPSTAIRS IN STONE BUILDING

## How jet propulsion creates employment for Canadians

The principle of the gas turbine has long been known but its most recent application to the jet engine is one of the sensational developments of our time. One of the main problems in these engines is to get metals to stand up under the intense heat and stresses involved.

Development work on the gas turbine is now world-wide. Much progress in design and development has already been carried out in Canada.

To stand up under the terrific stresses at high temperatures, the important parts of turbines, blowers and combustion chambers in the gas turbine are being made of Inconel, Stainless Steel and other Nickel alloys. Without such heat-resisting metals, these new type engines would not be possible.

The International Nickel Company is co-operating to the fullest extent with the technicians who are developing these

new engines, and placing all their technical knowledge regarding Nickel alloys at their disposal.

When these new engines are brought into volume production thousands of Canadians will be employed in making this entirely new source of motive power available to industry and transportation. This and numerous other present-day developments will provide new markets for Canadian Nickel, and so provide jobs for the thousands of men employed in the Canadian Nickel industry. Thus does research develop better products, create more employment.

"The Romance of Nickel" a 60-page book fully illustrated, will be sent free on request to anyone interested.
