Old Smithers Mine Reopens

With a two-phase production plan whereby a small mill will be installed immediately for the treatment and shipping of gold ore, the proceeds of which will be used to finance the development of extensive silver-lead-zinc resources and the setting up of a much larger mill for the purposes of the lower value minerals, the well known old Glacier Gulch mining property near Smithers has changed hands and is once again the scene of active operations.

Glacier Gulch is situated on Hudson Bay mountain overlooking Lake Kathlyn and about six miles west of Smithers.

The property has been acquired from the original owner—Stuart Campbell, Grover Loveless and Les Banta—by the Glacier Gulch Mining Co. Ltd., a company of young Fraser Valley men, headed by W. E. Forbes of Mission as president and consisting also of L. W. Boddie, Mission, vice-president, L. Quance of Vancouver and John Borne of Abbotsford.

With C. A. Munro as superintendent, seven men are now at work on the property clearing up the workings and renovating buildings and road which connects the property direct with the highway.

In the city yesterday was Mr. Forbes who was looking into the possibility of acquiring the old government ore sampling plant which might be used as a mill for the gold ore. Mr. Forbes was accompanied by Harry King of Terrace.

Mr. Forbes, speaking to the Daily News, referred to the unusual set-up of the property with its two distinct ore bodies—one gold-bismuth and the other silver-lead-zinc, the development and operation of which could be so complemented.

Expectation is that the gold mill will be producing this year.

The concentrates will be shipped out over the railway from Smithers.

There are some 500 feet of tunnels and shafts on the property which shipped four carloads of gold ore between 1933 and 1937.

The property is equipped with five camp buildings which Mr. Forbes says are sufficient to meet present accommodation requirements.

Silver Standard At Duthie Mine

SMITHERS—Interesting rumor current here is that Silver Standard Mines Ltd., which for some time has been successfully operating the famous old mine of that name at Hazelton, has become interested in the equally famous Duthie mine on the eastern slope of Hudson Bay mountain here. Once one of the spectacular mines of this district, the Duthie has been inactive for many years but has always been regarded as having further definite possibilities.

A FEW POINTERS — Governor-General Alexander gets a square dance lesson after a "chuck-wagon dinner" at the Calgary Stampede. Viscountess Alexander, top right, danced in the same set with A. L. Smith, member of parliament for Calgary West, and Mayor Don Mackay. The Alexanders spent two days at the week-long stampede. (CP Photo)

IN 50 YEARS
ALUMINUM HAS GROWN TO BE A LARGE PART OF CANADIAN LIVING
Toronto—First Aluminum-ware factory in Canada

Building the home for Wear-Ever

1950 is the fiftieth anniversary of the Wear-Ever line in Canada. These aluminum cooking utensils were introduced here at the beginning of the century. Their popularity grew so rapidly that, by 1912, a new factory was needed to supply the demand. This was built in Toronto. It was the first plant in Canada to make aluminum articles—and this was only a dozen years after the first Canadian smelter had started making aluminum ingots at Shawinigan Falls.

Today Alcan has twelve plants, all of them engaged in the aluminum industry; while more than 1000 independent companies across Canada shape the metal into all sorts of useful forms—from kettles to freight cars.
