V/E THINK that Prince Rupert, Central British Columbia and the province as a whole did the right thing at the polls in yesterday's provincial election.

Returned with an overwhelming mapority, the Coalition government has been accorded a mandate to carry on the good work which it has commenced. Many assurances were made by the coalition of its ambitious plans for the province if it was returned to office. The promising is now over and the people tractors. will be expecting the government to set about immediately with the fulfilment. As for ourselves we funds and personal help at the have no doubt of the government's intention and time of the flood in May, 1948. competence. The Johnson-Anscomb administration, we believe, will lead this province to a brighter and greader future although the difficulties and the problems that will be encountered are not to be discounted. Prince Rupert is out of the political wilderness again with the election of Jack McRae, the young city business man, who we are sending to Victoria as a supporter of the coalition. Mr. McRae proved leading. his mettle in the campaign, showing his comprehension, energy and presentability. We were pleasantly impressed with his ability on the hustings. In the Legislature we know we are going to have a representative who will be a distinct credit to the seat which he represents and who will be well able to present our case on all occasions and accomplish things on our behalf. We congratulate him on his victory and assure him of our full co-operation in connection with the promotion of the affairs of this riding.

RAT EXTERMINATION

Of almost equal interest and importance to us were the contests in the various interior ridings and Atlin to the north. We never had any doubt but that Hon. E. T. Kenney, the northern minister, would be re-elected with a thumping majority but we wish to congratulate him once again, also W. D. 14.000 Smith, in Atlin, and Cecil Steele and Harry Bowman in the Omineca and Fort George ridings respectively.

Terrace.

Dorothy Angelina Sherwood,

TRUTH ABOUT SMELTERS

One of these refers to the Consolidated Mining and Smelting Company. The truth about their doings here can be summed up as follows: They have expended over one million dollars in this district and, up to the present, with no profit to themselves. For the property they worked, they paid two prospectors over a quarter of a million dollars, the exact sum being \$300,000. The people of this district were very glad to have this company here and were sorry when they pulled out. Some

people have this company pictured as owned by two or three DISAPPOINTED BUT SMILfat tycoons smoking big cigars ING-W. H. Brett, defeated but the truth is that the C.M. C.C.F., who says his party and S. is owned by several thous-

We think that, after the season on the political outside, these northern districts were wise in getting back in the government column again.

Possibly it is unfortunate that a stronger opposition has not been elected. If there is to be good legislation and good government, vigorous and effective opposition is needed. The C.C.F. claimed that it was largely instrumental for initiating by its suggestions many of the items of good legislation that the coalition government gave us. We hope the C.C.F. diminished as it may be, will just keep on making good suggestions and that the government, as it rightly should, will go on accepting them.

To the losers in the election in these parts we also extend our good wishes. Mr. Brett, during his four years, was an earnest representative and we are convinced always had the best interests of his riding and constituents at heart although he might not have been in a very propitious position to give the most effective service.

The losers have the consolation of knowing that they offered their services and, thereby, showed

Above all, and as we have said after every election, now is the time for all to get together and work and boost energetically and co-operatively. Such counsel was never more timely than at this stage in the affairs of the province of British Columbia and this rapidly developing section thereof.
