Where does the money go?

At times most of us have looked at purse, wallet or bankbook, and wondered: "Where does the money go?"

You may have wondered, too, where does our money go—the money we receive for gasoline, fuel oil, lubricants and other products we sell. Well, last year each dollar we received went this way:

CRUDE OIL and other raw materials took more than half of each dollar.

MANUFACTURING AND PACKAGING took more than 11 cents. Costly equipment and skilled workers were needed to make the 640 products we supplied for thousands of uses.

TRANSPORTATION took the next big bite of the dollar. Products moved over wide areas to serve every community in Canada. During 1949 we paid more than \$34 millions for railway freight alone.

MARKETING was next. Marketing brought you the products you needed when and where you needed them... power, heat and lubricants for factory, home and farm. Marketing supplied your neighborhood dealer, that independent businessman, so that he could serve you conveniently and dependably.

TAXES to provincial and federal governments took 7.53 cents. And this did not include gasoline tax, which—depending on where you live—took from 21 to 33 cents out of every dollar you spent for standard grade gasoline.

PROFIT was 3.89 cents out of each sales dollar. Of this 2.25 cents went to shareholders as dividends. The rest—along with money we borrowed and obtained by sales of investments—was put back into the business to replace worn out equipment, to provide new equipment and make sure that we can continue to supply your needs in the future.

Bringing you oil is a big job
... and a costly one
