BASKETBALL— SAVOY SWAMPS BROWNWOODS IN SENIOR GAME

Savoys 51, Brownwoods 31.
Bo-Me-Hi 31, Merchants 24.
Peoples Store 28, Sweet Sixteen 16.
65 Taxi 28, High School 21.

Before one of the largest Tuesday evening crowds of the season the Savoys entry of the Senior Basketball League last night moved to within one game of the league-leading Co-ops by swamping the Brownwoods squad 51 to 31. Led by the Holkestad brothers the Savoys overcame a two-point deficit to outscore a completely disorganized Brownwoods 33 to 11.

The shoemen jumped off to a 10-point lead in the first quarter but Savoys gradually whittled it down until at the first half Brownwoods led by a two-point margin. It was in the second half that the Savoys boys really got going. With Rup Holkestad netting 16 of his 21 points, followed by his brother Mel with 10 they completely out-classed the Brownwoods.

Brownwoods seemed to fall completely apart. They missed shots, threw away passes and in

general did everything they were not supposed to. Savoy, in the meantime, played smooth and fast ball and were quick to take advantage of every Brownwood error.

Sid Alexander, at guard for Savoy, put in one of his best performances of the year. Teamed with Sev. Dominato they stopped the Brownwoods at every turn.

INTERMEDIATE GAME EXCITING

The Intermediate fixture was the most exciting game of the evening with Bo-Me-Hi taking a close one from the hard-fighting Merchant crew. The scholars had an 11-point lead at the end of the third quarter which the Merchants at times seemed about to overtake in the final session. They were within catching distance when Spring scored two quick baskets to take the game for Bo-Me-Hi 31 to 24.

PEOPLES STORE LEAD SWEET SIXTEEN

In the Ladies' League the Peoples Store girls kept their undefeated record by defeating the Sweet Sixteen girls 28 to 16. Teddy Thornton and Beth Sedgwick with 8 and 6 points respectively were high scorers for Peoples Store while Nina Youngman took the honors for Sweet Sixteen with 8.

65 TAXI WINS JUNIOR GAME

65 Taxi continued their win-

PORTRAIT OF A CARELESS HUNTER—Armando Molina, 16-year-old hunter of San Francisco, learns the hard way to never carry a loaded rifle in a moving vehicle. He was riding a bus, on his way to a hunting trip with friends. The bus hit a bump and his .22 rifle, resting in his lap, discharged, sending a slug through his shoulder and severing an artery. An ambulance steward attends the writhing youth as spectators get a close-up view through one of the windows of the bus.

ning ways in the Junior league by defeating the Bo-Me-Hi Junior squad 28 to 21. At the end of the first half the students were trailing 15 to 6 and at the three-quarter mark they were further behind by a score of 28 to 11. In the final quarter they made a strong bid for a win when they scored 10 points while holding the winners scoreless.

Science Shows Best Way To Water Indoor Seed-Box

Two Methods of Watering Seed Box O.K'd by Science

So important is water to seedling plants, which are started in green-houses, hot-beds or in the home, that scientists in several universities have made exhaustive experiments to learn a safe method of watering.

If the soil gets too dry, the tiny seedlings with their shallow roots may perish in an hour. If kept too wet, fungi may develop, resulting in the fatal disease called "damping off." To keep the moisture "just right" was formerly a matter of experienced judgment, and required a constant watch in the seed flat, difficult for the amateur.

But science has found two methods which may be followed both better than the old-fashioned way of spraying on water from above, whenever in the judgment of the gardener watering was required. These methods are illustrated. On the left is the wick method; on the right, sub-irrigation.

Dr. Kenneth Post of Cornell University, who has been a leader in experiments to develop efficient watering methods, was asked which method he recommended.

"I believe the best method of watering seed flats in the home is the wick method," he said. "This consists of using a burlap wick or one of glass which can be obtained from the various seed houses, inserting one wick in the center of the flat spreading it over about three inches in diameter on the bottom of the flat inside and letting the wick hang in the water. The water then moves up to the soil by a capillary action and keeps the flat at a constant uniform moisture content."

"I prefer it to the sub-irrigation system where a waterproof
