There was a young lady
named Perkins,
Who simply doted on gher-
kins;
In spite of advice,
She ate so much spice,
That she pickled her internal
workin's.

Reminiscences

By W. J. — and REFLECTIONS

Another cruiser race from Seattle north is planned for next July. It will be from Seattle to Juneau. To share in one is good for what ails you. The Seattle-Prince Rupert contest, years ago, was not only remarkable for the general interest it aroused. The beauty and value of the silverware was little short of stunning.

A woman columnist strongly urges that a special annual tax of a thousand dollars a year should be levied on each unmarried man. Which leads the Juneau Empire to inform her, and quite correctly, she should know a tax on liberty is unconstitutional.

Question! With times quiet for years, and housing shortage taken as a matter of course how much shorter will the shortage be when the spending of 25 million dollars a few miles out of town will start becoming translated into industrial action?

There is still a place on the surface of the seas and lakes for the tall mast and swelling sail. It sounds a shade romantic but, for the moment, we're in the mood. Coming down to cases, though, Lloyds' Register lists 750 sailing clubs in the

Down comes a jack pine to be cut into six-foot lengths and hauled to rivers. Thousands of logs on ice at Stevens, Ont., await spring thaws which will float them downstream.

United States, and there would be far more were Canada included. There's plenty of water north of the border, and all the boats are not power-driven.

How do you like to hear people saying "hospitalized," "readied," "contacted" or "guys"? No harm done, of course. Easy to pronounce, remember or spell. Yet, one keeps thinking of music, a bit off key.

There has been snow on the British Columbia coast. No one will deny it. But this still remains Canada's evergreen land. The east will continue to think of the Pacific slope as a verdant region where winter air lacks the sting, the breeze is soft, and there's the trickle of rain. And the east won't be wrong.

A young woman who had recently taken charge of a kindergarten entered a trolley car, and as she took a seat, smiled pleasantly at a gentleman sitting opposite her. He raised his hat, but it was evident that he did not recognize her. Realizing her error, she said in tones:

HOW CAN I ???

By ANNE ASHLEY

Q. How can I remove scorch-
ed spots from woolen fabrics?

A. This is difficult to do because even light scorching on wool weakens the fibres. Try wetting the scorched spots immediately with glycerine and letting remain about a half-hour before washing. If fabric is not washable, rub lightly with a piece of white flannel, wrung very dry out of cold water and slightly moistened with glycerine.

Q. How can I make a key turn
more easily in a door lock?

AR. Try dipping the key in oil, then lock and unlock the door a few times. It will soon turn smoothly. The same treatment can be given an obstinate bolt.

Q. How can I whiten the skin?
A. An application of equal parts of rose water and lemon juice acts as a skin whitener.

audible throughout the car:
"Oh! Please excuse me! I mistook you for the father of two of my children."

She got out at the next cor-
ridor.

Port Edward Shipping Herring Oil—Ocean Vessel Coming—Q. C. I. Camps Reopening

An American tanker, under charter to the Frank Waterhouse line, will dock at Port Edward tonight to load a quantity of herring oil for shipment to Vancouver. It is the 162-foot vessel Argo, which will dock at Nelson Bros. herring reduction plant on her first northern trip in Canadian service.

Throughout the winter, the Argo has been in the Waterhouse service carrying similar cargoes from west coast of Vancouver Island points, Ucluelet, Ceepeece and others.

At Port Edward, she will load 80,000 gallons of oil, then proceed back south to Butedale and Klenau where she will take on the balance of her 200,000-gallon capacity.

Manned by an American crew and officers, she will carry a Canadian pilot, Capt. Jack Woods of the Waterhouse line.

The cargo will be delivered to the Lapointe Pier at Vancouver where the various fishing companies have storage tanks.

A cargo of structural steel for the Watson Island pulp plant of the Columbia Cellulose Co. is expected to arrive at Port Edward within the next month or so aboard a Belgian deep sea vessel. The steel will come from the eastern United States.

The Kelchikan fish packer Sydney, Capt. Osmund Hendrickson, arrived in port here Friday to discharge four carloads of frozen fish for rail shipment to the United States market. It was her first trip in more than a week because of the uncertainty of rail transportation out of this port.

Approach of spring is restoring some activity to the Queen Charlotte Islands logging industry. The Union steamer Coquitlam, which docked here at 1 p.m. Friday from Vancouver, carried 50 loggers for Aero Camp, Cumshewa Inlet, which is opening next week. Eight loggers embarked from Prince Rupert to work at the camp. Other camps are expected to open in the near

future after winter shut-downs.

A scowload of heavy equipment for the Campbell and Bennett construction firm, which has the contract for construction of a pipeline to supply water to the Columbia Cellulose Co. mill at Watson Island, arrived here this week and is moored at the Armour Salvage Co. dock. It consists of a large power shovel, several big diesel trucks and other equipment. Not since the wartime construction days have really large diesel trucks been seen in this area.

There is to be a power boat race between Seattle and Juneau next summer with a call at Prince Rupert. The total distance is 964 miles. Preliminary plans are now being studied by the International Power Boat Association. The first leg will be the same as for the international Olympia to Nanaimo contest, a distance of 179 miles. From Nanaimo, entering the race to Juneau will be the 438-mile run to Prince Rupert, with the finish time that far being slated for 5 p.m. July 13. The boats will be allowed an 8-hour lee-way on that leg, in case of accident. It is understood a city celebration is planned. Finish time for the 348-mile Juneau lap will be 2 p.m. July 16. So far 22 American and Canadian skippers expect to enter.

LETTERBOX

WOLVES AND DEER
Editor, Daily News:

Lovers of wild life are aware that this winter of heavy snows and low temperatures has made existence for the deer on this coast a very trying ordeal. They were not aware that provincial government regulations are protecting the lives of wolves who are finding the heavy snow a real ally and wholesale slaughter of deer has been and is going on in and around this district. The writer has seen deer approaching the shoreline driven from the heights by snow and followed closely by the wolves. On a short trip along the shore line beside my cabin I counted 10 partly eaten deer and gory evidence of wanton destruction of life. The writer believes that, were he granted permission to trap these wolves and other like permits were granted persons in a position such as myself, much could be done to re-establish the balance of nature and there would soon be fewer wolves.

Thanking you Mr. Editor for this space in your paper,
Tucks Inlet, RINGHOLM,

BLANCHE, N.S. — Reuben Smith and Olsen Perry, local fishermen, while on the job found a gull unable to fly, a mile and a half from shore. Investigation showed it had a muskrat trap attached to its leg.

Better English

By D. C. WILLIAMS

1. What is wrong with this sentence? "Jack is a splendid tennis player."
2. What is the correct pronunciation of "granary?"
3. Which one of these words is misspelled? Ennoble, ennuil, enactment.
4. What does the word "salubrious" mean?

Answers:
1. Say, "Jack is a splendid tennis player." 2. Pronounce "granary" with a hard "g" and a soft "a." 3. Ennoble, ennuil, enactment. 4. "Salubrious" means "promoting health." "Exercise, when moderate, is salutary."

Alcan

(Aluminum Company of Canada, Ltd.) makes aluminum ingots. More than 1000 independent manufacturers across Canada shape aluminum into light, strong, non-rusting articles for your use. The variety grows daily.

In addition to supplying these firms, Alcan sells about 85% of its ingots to other countries. This aluminum is now Canada's sixth largest export, a source of much needed money from abroad.

Because Alcan does market so much abroad, it is able to make aluminum in such large quantities that, in ingot form, it can be purchased more cheaply in Canada than anywhere else in the world.

ALUMINUM COMPANY OF CANADA, LTD.
Producers and Processors of Aluminum for Canadian Industry and World Markets
MONTREAL QUEBEC TORONTO VANCOUVER WINDSOR

A A thirteenth of the earth's crust is aluminum. It is found in mountains and gems, in vegetables and clay, in meat and water — practically everywhere.

L Long ago the Romans knew it as a salt. They called it "alumen" and used it as a medicine or for dyeing cloth.

U Until the middle 1800's, the metal aluminum was rarer and more costly than gold. Napoleon III had his own personal tableware made of it.

M Modern science found a way to make it cheaper. That is why, today, everybody can buy useful and lasting articles made of aluminum.

I In Canada we have none of the high-grade aluminum ore called "bauxite". Canadians bring it in by shipload from British Guiana — a voyage of 3000 miles.

N Northeastern Canada has the world's largest aluminum smelter. Alcan built it there, at Arvida. This site was chosen because it is close to both a port for ocean ships bringing bauxite and an abundant source of hydro-electric power.

U Until Alcan harnessed this water power, it ran to waste. Smelting aluminum needs vast supplies of power. The electricity required to produce one ton of aluminum would light your house for fifteen years.

M More than 15,000 people operate this Canadian industry. They earn more than thirty-five million dollars a year. These earnings flow across Canada.
