Agriculture In Skeena

Member for Skeena Tells Parliament of Its Importance in Riding

(From Hansard)

Mr. Applewhite (M. P. for Skeena): It may be a surprise to hon. members to know that the representatives of Skeena should take an interest in agriculture but I would assure hon. members that agriculture is only one of our primary industries. I think the minister will bear me out when I say that he has been approached by the Terrace board of trade and other organizations in the Skeena valley on more than one occasion requesting the establishment of a small illustration station in order to ascertain the value of the soil there for the production of small fruits and vegetables.

I regret that I cannot agree with the hon. member for Fraser Valley, who suggest that as his district has demonstrated its ability to produce more fruits and vegetables it should now have an illustration station in order to prove that they can do so. I suggest in all seriousness that the location of Terrace coupled with the tremendous development that is going on in the north-central area of British Columbia justifies the government in establishing a station there so that farmers may be advised what type of produce they should grow in order to take advantage of the markets which are now right at their doors at Prince Rupert and Prince George.

It may be said that there is already a station at Smithers, but Smithers is 141 miles from Terrace and as between the two locations there is a tremendous difference in the terrain. The type of farming carried on at Smithers is largely grain and stockraising, whereas the type of farming carried on at Terrace is the growing of fruits and vegetables. Terrace is the growing area possibly closest to the Pacific coast and it can readily supply the market of Prince Rupert. I request that the minister give consideration to this matter.

Agriculture: Representations were made to the experimental farms branch of the Department of Agriculture to have such a station established at Terrace and that branch has agreed that one should be established. At the present time they are looking over the area with the idea of selecting the farm upon which it ought to be established, and I can assure the hon. member that we will press on with that work as rapidly as possible.
