something "high grade" unless you pay a decent

Keep this in mind-you musn't expect to get

By a "decent price" we don't mean that you really must pay a lot of money.

Watches haven't advanced as much as lots of other things.

At least ours haven't—we bought the bulk of our stock quite a while ago. Railroad watches have actually been selling as

low as before the war. But for a reliable watch it isn't safe to go below \$30.00 to \$40.00.

If you come here that much will get you a watch good for 15 to 20 years.

If you've been thinking of watches even a little bit, it's time you called on us.
