Andrei Vishinsky Assails Trygve Lie

Contention In U.N. On Peace Proposals

NEW YORK (CP)—Andrei Vishinsky, Russia's foreign commissar, assailed Trygve Lie's 20-year peace plan today on the ground that it was dictated by Washington. He also blasted Lie personally and warned the United Nations that it is useless to talk of peace through the United Nations if Russian peace proposals are ignored.

Vishinsky agreed with Lie's idea for high level meetings of the Security Council but tacked on a condition not acceptable to the United States that Communist China must sit on the council.

The assembly is awaiting the arrival of a nine-man delegation from Peiping.

Vishinsky charges that United States was the aggressor in North Korea and that the assembly is afraid to hear representatives of the North Koreans.

Canada To Pool Ships

One Hundred Vessels Will Be Available to Fact Nations If War Comes

OTTAWA (CP)—Canada will contribute 100 or more ships to the new wartime merchant shipping pool of the North Atlantic Fact nations.

Plans of the Canadian government are to make available to the pool, set up in Washington, Canadian-owned vessels which has been transferred to the British flag under an agreement made a year ago with the United Kingdom government.

Wheat King Drives Engine

TORONTO—Thirteen-year-old Rickey Sharpe, the world's champion wheat king of Munson, Alberta, today piloted the Canadian National Railway's crack "Continental Limited" into Toronto on the last leg of its long trip from western Canada.

When the young wheat king learned he was to travel over a thousand miles to attend the Royal Agricultural Winter Fair, his one desire was to see the horse show. Rickey has a special love for horses and for him, it was the dream of a life to stand behind the controls of a 330-ton "Iron Horse" while veteran engineer Fred Culverson of Toronto, explained the intricate controls.

The Continental Limited made a special stop at Oriole and Rickey raced from his coach to the cab of the giant locomotive, where fireman Ben Cookson and Fred Culverson helped him aboard. After the twenty-six mile ride into Toronto, Rickey was undecided as to whether he would remain a top notch farmer or become a locomotive engineer.

The boy was accompanied by the fair by his mother and an uncle awaiting them. They were met at the station by his aunt and uncle and Colonel T. L. Kennedy, minister of agriculture for Ontario, and amid the popping of flash bulbs and questioning reporters he flashed a big smile and took the proceedings calmly.

Rickey has come to the agricultural show to personally receive the Canadian National Railways trophy, emblematic of the world's wheat growing championship. The boy will also receive an engraved silver tray and a cheque for \$100.

AMERICAN WORLD VIEW—Maps influence political thinking; and maps can be misleading. It will never be known how much traditional American isolationism owed to the conventional world maps in Mercator projection, which created a false impression of an "isolated" America, safe and sheltered behind two oceans. The map above (based on an Oblique Mercator projection computed by the late Arthur Hinks, F.R.S.)—centred on the United States—illustrates the interdependence, in the air age, of the United States and countries on the opposite shores of the North Atlantic and North Pacific. It explains the background to modern American strategic thinking and justifies the view of most of her leaders that Europe is not only geographically America's nearest neighbor, but also strategically her most exposed and vulnerable flank.

City Council Talks Housing

Government Plan Essentially For Low Income Worker

Stressing that the new federal-provincial housing project is for the low income worker, J. E. Brown, housing commissioner for the province of British Columbia, addressed the city council yesterday afternoon.

"Flashy frills will be left off, but good liveable houses are what are built under this scheme," emphasized Mr. Brown. "But there should be sufficient concentration of the homes to achieve certain savings," he explained.

He said that for those who wanted more costly homes they could have them built upon the same rate of savings under the National Housing Scheme. City Clerk H. D. Thain said that some of the applicants were of this higher income type.

Although aldermen believed that some homes might be built in Westview, it was emphasized that the more concentrated the homes could be, the cheaper the service and costs. The commissioner felt Westview was a satisfactory building site.

Mention was made of the necessity of building sewers for new homes in Westview, but Mr. Brown pointed out that with rental homes this money could be paid out of government local improvement taxes. The city would not be liable for losses that might accrue over rental units; they would be paid by

Says Canada Has Curtain

But It Is Hatred and Not Iron, Declares Professor

WARSAW (CP)—Dr. Leopold Infeld, who returned to Poland last summer after 11 years as professor at the University of Toronto, told the Communist-sponsored world peace conference today that he has found no "iron curtain" in Poland but there was one in Canada. It was not one of iron "but of hatred" of him and criticism of his attitude, he told 3000 delegates.

Infeld, who was naturalized in Canada, is described as one of the world's outstanding mathematicians.

Looking To Northwest

Resources Minister—

BOSTON (CP)—Canadian Minister of National Resources Winters said yesterday that the days of discovery in Canada's vast Northwest Territories "are by no means past."

Mr. Winters said there were numerous rich prospects in the north which was once considered a barren, desolate and worthless wasteland.

Brother Bills To Reorganize

P. A. Miquelon of Edmonton, Dominion grand organizer for the Benevolent and Protective Order of Elks, told the Daily News today that he is meeting with a very favorable response in the matter of re-establishing the lodge in the city. He expressed confidence about the prospects of re-instituting a lodge with a new charter membership of at least one hundred within the next two weeks. An informal meeting of former members as well as others interested will be held at the Civic Centre Sunday afternoon.

H. L. McGlinchy, Mission plumber and a son of Hugh McGlinchy, who was an early-day police officer in Prince Rupert, is back in the city of his childhood. He is in charge of plumbing installations for the Fraser Valley Construction Co. in the new liquor store here.

Public Meeting Hears Government's Scheme

HOUSING BADLY NEEDED—

Solid, substantial stock model houses with concrete foundations and furnaces but without frills can be made available under the federal-provincial scheme to provide housing for rental and purchase in communities where an emergency exists and where the local authorities take the initiative in establishing the need, J. E. Brown, housing commissioner for British Columbia, told a large public meeting last night in the Civic Centre. The keen interest that exists in the problem of providing more adequate housing for the city was amply demonstrated by the fact that the common lounge was filled to capacity with the crowd overflowing into the corridors.

Under the joint governmental scheme, Mr. Brown said there will be no custom built "picture houses." They will be well constructed stock models designed to meet the needs of people who find it impossible in any other manner to obtain homes. The quality would be more substantial and permanent than wartime housing type. The scheme is intended in no manner to enter into competition with private building.

Mr. Brown explained that it was a scheme based on three levels of government co-operation—the federal government providing 75 per cent of the cost, the provincial government 25 per cent, and the municipal government taking the initiative, establishing the need, locating the necessary land and assuming the local management such as determining those who are entitled to tenancy, and making the collections.

SCHEME OUTLINED

Mr. Brown, called upon by Mayor G. W. Rudderham, who presided, briefly outlined the scheme in general terms and a question-and-answer period followed.

Unless there was a minimum of 25 houses, not much would be achieved in the way of savings, Mr. Brown said. The process was to determine the quantity of units required, call for public tender, and then proceed with construction. Rent was based on the cost of the house—say 70 cents per month per \$100 which would make the monthly rental of a \$6000 house \$42. There should be a "fair degree of concentration" in the location of the houses. To scatter them tended to defeat the purpose.

Mad Gunman Kills Five

Grim Tragedy in New Jersey Village Family Slayings

VINELAND, New Jersey (CP)—A berserk man about 26 years old machine-gunned to death five people last night including three of his estranged wife's family and his uncle. At least six others were reported wounded in tragic shootings in Piney Hollow in the farm section of south Jersey.

The gunman was identified as Ernest Ingento. He killed the victims in the homes of his estranged wife and her father and then escaped in a green four-door sedan through a police dragnet.

Police said that gunman sped to another rural district and wounded several persons.

Among the wounded were Ingento's wife, Tessie, 23, and a nine-year-old girl, Jean Pioppie. All are reported to be in critical condition.

Strike Is All Over

VANCOUVER (CP)—Shipyard workers at Vancouver's Pacific Dry Dock returned to work late today following an eight-hour walk-out over a holiday clause in their strike settlement.

The men returned to work after an all-day session between company and union representatives.

Officials said an agreement had been reached.

The men returned after a month-long strike for more wages yesterday but staged a sitdown strike over the holiday clause.

POWDER-CARRYING YOUTHS REBUKED

VANCOUVER—"You should have your heads examined and work done on other parts of your anatomy," said a Vancouver magistrate yesterday in passing sentence on three youths in whose possession in a car dynamite was found Halloween night. They were sentenced to three days in jail and fined \$100 each.

Life Sentence For Sex Killer

BRUNSWICK, Germany (CP)—A German court Friday sentenced husky Rudolf Piel to a life term in prison after he had said he killed nine women and a man to obtain "sexual satisfaction." There is not a death penalty in West Germany.

Piel, 26-year-old blacksmith, first killed a Russian soldier, he confessed.

His two accomplices, Karl Hoffman and Konrad Schuessler, were also sentenced to life terms.
