Mackenzie King Stricken, Condition Grave

MR. KING

Former Prime Minister Stricken From Pneumonia

OTTAWA—(CP)—Former Prime Minister William Mackenzie King has suffered an attack of pneumonia at his summer home in Kingsmere. His condition was reported at noon as being "gravely grave."

King, now in his seventy-sixth year, lapsed into unconsciousness today after being stricken late Thursday afternoon at his Kingsmere summer home on the lakeside resort of Kingsmere, twenty miles from Ottawa.

Dr. J. H. McCallum, who has been attending to King since he was stricken, said he had no hope for the former Prime Minister's recovery. He said that King had been confined to his room for a month in the fall of 1949, when he had gone, although he had intended to attend a meeting of the Commonwealth Prime Ministers' Conference in Ottawa in October of that year.

King's illness today is the latest in a series of attacks since illness struck him in the fall of 1949. He was confined to his room for a month in the fall of 1949, when he had gone, although he had intended to attend a meeting of the Commonwealth Prime Ministers' Conference in Ottawa in October of that year.
