SWEET PEAS—

Sweet peas are almost a must in most flower gardens throughout Canada. Except in those few areas where hot summer nights come early, there should be little difficulty in making a good showing. The secret is an early start, and preferably in a prepared bed. These plants, as well as the vegetable variety, make their first growth when soil and air are fairly cool, therefore planting just as soon as the soil is fit to work is advisable.

It is best to dig a trench about a foot or so deep. In the bottom put a six-inch layer of well-rotted leaves and manure. On top of this should be a couple of inches of good rich loam. In this the seed is planted about two inches apart and half an inch deep. Gradually as the plants

develop the trench fills in, thus encouraging a deep root growth. Recently very much improved varieties have been available in Canada, as well as new colors. When the plants are up three or four inches some support for climbing should be provided. This may be brush or strings, or a combination of the two. Wire is not advisable as it is liable to cut or burn the tender growth. If flowers are removed daily and no seed pods allowed to form, blooming will last far longer.

Lawns Need Attention—Grass seed is another thing that makes its best growth during the cool weather. The seed can be sown even before the last snow has disappeared. It is best to do this on a day when there is no wind and to make sure of even coverage it is advisable to broadcast from two directions. Some experts even advocate sowing last thing in the fall. The seed will lie dormant throughout the winter and start to grow first thing in the spring.

For new lawns the ground should be thoroughly prepared, cultivated several times to level off the surface and kill the weeds. Repairs are handled in somewhat the same fashion, with the bald spots raked thoroughly to open up the soil. A light raking one way will cover seed sufficiently.

Well nourished grass and high quality blended seed from a reliable seed house will usually crowd out most weeds. Grass like any other plant will benefit from a good dressing of fertilizer. Commercial fertilizer, because it is free from weeds, is recommended. It should be high in nitrogen, which is the chemical element which provides the green growth in plants.

A little early work with the spudder and regular cutting with the lawn mower will help. Then there are the new 2-4-D well-formed buds. The roots should be protected from the air carefully according to directions and be moist or wet, and it is

MOTHER NATURE HAS LAST FLING AT WINTER — With spring beginning officially on March 21, Mother Nature had a last fling and blanketed eastern Canada with its heaviest snowfall of the season. Scenes like this one were not uncommon in the east. Traffic was turned into a caterpillar procession but no serious accidents were reported.

and after the weather turns warm. They are a little hard on clover, but they certainly do an amazing job in destroying dandelion, dock, plantain and most other weeds. Where there is heavy infestation one should follow with fertilizer, watering and some reseeded so that grass will take over where the weeds have been killed or removed.

Nursery Stock—Nursery stock is the term applied to shrubbery, vines, trees, etc. The wood of top quality stock will be green, pliable and with some strong. Then there are the new 2-4-D well-formed buds. The roots should be protected from the air carefully according to directions and be moist or wet, and it is

necessary that they be kept in that condition until they are planted in their new quarters and growing. If the ground is not fit to receive them when purchased the plants should be "heeled in," that is planted temporarily in a trench with soil packed about roots.

Timely Recipe

RICE AND HAM CREOLE
2 large onions
2 green peppers
1 cup chopped, frayed ham
3 tablespoons bacon drippings or other fat
2 cups cooked rice
2 cups canned tomatoes
1/2 teaspoon salt

Cut onions and peppers in small pieces and saute lightly in the fat. Add rice, tomatoes, salt and ham. Mix well. Pour into a greased casserole or baking dish and bake in a moderate oven for about 25 to 30 minutes in a 375 degree oven. It doesn't matter which, but use the one that is most convenient for any other cooking that is being done for the meal.

RELIEVING LABRADOR

ST. JOHN'S, Newfoundland — The Canadian ice-breaker Sorel, loaded with \$25,000 worth of supplies, left here yesterday with a fourth shipment of food to help relieve starvation conditions in seven icebound southern Labrador villages. The supplies would tide the hunger-stricken hamlets over the remainder of the shut-in season.

UNHAPPY DAYS FOR DOCTORS

LONDON—Standards of medical treatment in Britain have deteriorated but it is certain this is not the fault of the profession, declares a British Medical Association spokesman. The blunt fact is, doctors are desperately overworked. Why? The Association says: "It is mainly because the bureaucrats who devised the National Health Service either have no knowledge of human nature or pretend that nothing of the sort exists. When the general run of people discover they can obtain something for nothing, they will not overlook it. The service of physicians has become a state gift shop. Hundreds of persons, with nothing seriously wrong with them, show up for attention, and the doctors are busy all day and half the night. Numerous complaints are trivial. The surgery queues are becoming longer all the time."

"After bedtime there are the usual birth and emergency calls. The doctor also has clerical duties he did not have before. Every surgery now has its cabinet of record cards. On these, every illness of every registered patient is entered—for inspection. There are also stacks of official forms. There are forms to fill for people who want free milk, exemption from jury service, extra allocations of coal, free transport to polling booths. And there are certain kinds of nerve food that the unhappy doctor himself, not the government, is called on to pay for."

HAVOLINE MOTOR OIL

RELEASES MORE

Because it keeps engines cleaner and better lubricated

Havoline is here — obtainable from your local McColl-Frontenac Dealer.
New and Improved Havoline is more than just a motor lubricant... it's a motor cleanser too. Havoline actually cleans as it lubricates, rids your engine of clogging carbon and sludge — releasing more Power for your car.
Drive to your McColl-Frontenac dealer today. Ask him to change your oil to Havoline. Then find out for yourself what a difference a really clean motor can make.

Tune in: **TEXACO STAR THEATRE**
Wednesday nights, CBC. See newspaper for time and station.

* AT McCOLL-FRONTENAC DEALERS

6 Powerful Reasons Why It Pays To Use New HAVOLINE Motor Oil

- 1. MORE POWER**—With clogging carbon and sludge removed, every part works more efficiently.
- 2. MORE GAS MILES**—A clean motor can do its job more easily, so it uses less fuel.
- 3. MORE OIL MILES**—Oil lubricates better in a clean motor; more protection from wear.
- 4. MORE ECONOMY**—Not only in gas and oil but in repairs, through less wear.
- 5. MORE PLEASURE**—You get smoother, more dependable engine performance.
- 6. MORE CAR MILES**—You get longer engine life, extra protection against corrosion, too.

Change to **HAVOLINE** now!
