It's simply wonderful . . . the difference in jam and jellymaking when you use Certo. You get jams and jellies that look better, taste better, are better . . . and much more of them. That's because Certo is "fruit pectin" the natural substance in fruit that makes jams "jam" and jellies "jell" - extracted and refined ready for your use.

THE CERTO BOIL IS SO SHORT

With Certo you boil only one-to-two minutes for jams a half-minute-to-a-minute for jellies. NO prolonged, tedious boiling to make sure your jam or jelly will set. Certo makes all fruits set "just right". This extremely Certo short boil means:

THIS IS YOUR CERTO RECIPE BOOKLET

I You get 50% more jam or jelly because practically none of your precious fruit juice is boiled away.

2 The time you spend is cut down to a fraction. 3 The natural colour and taste

of the fresh fruit are retained. The Certo boil is too short to dull the one or spoil the other.

If you are only a beginner, don't worry. You'll have no failures if you follow exactly the recipes provided with Certo. Since different fruits need different handling, there's a separate, kitchen-tested recipe for each one.
