HOW CAN I ? ? ?

Q. How can I transplant a maple tree properly?
A. The best time to transplant a maple tree is the early spring, before any buds have appeared. Choose a rainy spell when the ground is soft, and preserve as much of the root as possible. This refers to trees not more than six or eight feet high. Then trim down the crown of the tree.
Q. What is a good antiseptic mouth wash?
A. The use of a dash of lemon juice in plain water is said to be very good.
Q. How can I keep the powder puff soft and fluffy?
A. Wash it in warm, soapy water, and then rinse in soapy water.
