MAKES ATLAS OF HEAVENS—Dr. Aioert G. Wilson, of the California Institute of Technology, is shown at the viewfinder of the 48-inch telescope-camera on Mt. Palomar. He is in charge of the project just begun, to make more than 2,000 photographs which will comprise a complete atlas of the heavens, using the huge camera which has recently been completed. The camera does in a year what would take other cameras a century.

Small Electric Appliances that do BIG JOB

No woman whose home is equipped with modern electrical appliances would dream of trying to get along without them.

Convenience, speed, efficiency, ease-of-operation and economy . . . these are some of the qualities that women have come to expect — and always get — from their electric servants.

An automatic iron, an electric tea-kettle, a toaster — these are only a few of dozens of indispensable electric aides waiting, and ready, to serve you.
