THE RECOMMISSIONING of the Canadian destroyer Cayuga at Esquimalt, was an important event for both Lt.-Cmdr. William P. Hayes of Swift Current, Sask., and Alice, the ship's mascot. Alice joined the Cayuga at Guam in 1950 during the ship's first operational tour with the United Nations forces in the Far East. Cmdr. Hayes is the Cayuga's new captain.

SEGREGATED AUDIENCES 'OUT' FOR NOTED SINGER

VICTORIA @-Marian Anderson, famous American concert singer, will no longer sing before segregated audiences.

This, she said in an interview here, is part of her long campaign for understanding between Negroes and their fellow American citizens.

Miss Anderson recalled her early concerts in the southern United States when Negroes were permitted to sit only in the upper balcony.

District News

FRANCOIS LAKE

The annual meeting of the Farmers' Institute was held for the election of new officers for

1953 with the following results: President, Robert Peebles; vicepresident, K. Shaffer; secretary A. Peters; directors, D. Eaton and J. Keefe; auditors, Rev. A. Atkinson and H. H. Neave.

There were thirteen present at the meeting. The most important topic brought up for discussion was the prospect of bringing in electric power to this district from Burns Lake.

It was decided to have the all those loose snapshots that usual St. Patrick's Day dance in have been hanging around for so the hall here.

British Columbia will have the largest plant of its kind on earth.

\$500,000,000 FOR POWER 6000 NEW JOBS

A NEW CITY OF 50,000 IS IN THE MAKING

That's the exciting story told in the leading article of the March "Reader's Digest" of a modern miracle created by free enterprise. All North America is reading and talking about it.

The Aluminum Company of Canada's smelting plant at Kitimat is hailed as "the most spectacular Canadian construction feat since the Canadian Pacific Railroad."

In glowing terms, the article classifies the 1,650,000 horsepower hydro development as the equivalent of Bonneville Dam, Shasta Dam, and Wilson Dam at Muscle

Kitimat will be the largest aluminum smelting plant on earth with an annual capacity of 550,000 tons, equal to 65% of present U.S. production.

In the building, more than \$500,000,-000 will be spent, much of it pouring into the bloodstream of British Columbia's economy. More than 6000 men are at work, creating a city at Kitimat where, by 1954, there will be 7500 inhabitants. When the plant is operating to capacity, it will have a population of 50,000 to rank it as British Columbia's third citywhere none existed before.

This is a spectacular example of free enterprise at work. The decision to build Kitimat was influenced by the existence in British Columbia of a population which repeatedly has endorsed free enterprise. Only under the stimulus of a free enterprise government will MORE industry be attracted to British Columbia. Good jobs and job security depend on the freedom system . . . and confidence.
