

FRANCES HYLAND, Saskatchewan-born actress who returned recently from a successful career on the London stage, is at Stratford, Ont., to begin rehearsals for this summer's Shakespearean festival. She talks with Cecil Clarke of London, artistic adviser to the festival, who will direct "Measure for Measure," in which Miss Hyland plays opposite James Mason, British stage and film star. Other plays to be presented are "Taming of the Shrew," and "Oedipus Rex." (CP Photo)

## Serve Apricot Angel Cake For June Brides' Showers

APRICOT CREAM DRESSES UP CAKE

This is the time of year when brides march down the aisle, so from now on, the bridal showers will occupy a favored spot in home entertaining.

Refreshments for a party honoring the bride-to-be follow a certain pattern. They must be festive and feminine in appearance, by all means. Flavors tend to be delicate. Sweet things seem to win out.

Here's a contribution to the able for brides. It's Apricot Angel Cake, a feathery light angel food cake with a filling and topping of apricot cream.

The cake itself can be homemade or bakery-bought. It's the apricot cream that transforms it into a "bridey" dessert. Stop in the baby food department of your local food market or drug store, pick up a jar or tin of junior apricots and applesauce. Its clear, fresh fruit flavor is the secret of your "frosting's" fine flavor.

Here's the complete recipe:

- APRICOT ANGEL CAKE**
- 2 teaspoons unflavored gelatine
  - 1/2 cup orange juice
  - 1 tin strained apricots
  - 1 tin strained applesauce
  - 2 teaspoons lemon juice
  - 1/2 teaspoon salt
  - 1/2 cup granulated sugar
  - 1 cup (1/2 pint) whipping cream, whipped
  - 1 small (8-12-ounce) angel food cake

Soften gelatine in orange juice; dissolve over hot water. Combine apricots, applesauce and next 3 ingredients; chill, without stirring, until firm. Beat mixture with electric mixer or rotary beater until light and foamy; fold in whipped cream. Slice cake horizontally into 3 layers. Spread apricot mixture between layers, on top and on sides of cake. Chill several hours or until firm.

## Daughters Plan Project To Provide Aid to Korea

SAINT JOHN, N.B. (P)—A project to aid Korea was born Monday at the national annual meeting of the Imperial Order Daughters of the Empire.

A newly-created "Korea projects fund," will provide equipment and food to alleviate suffering. The IODE will concentrate on needy children, working through the "save the children" fund.

## Mother Makes Profession Of Painting

SAULT STE. MARIE, Ont. (CP)—Joyce Thompson made a career in the commercial paint contracting business after decorating the woodwork in her new home.

The 30-year-old mother of four children has just finished two big jobs—decoration of the woodwork in the Goulais bay country school addition, 23 miles from here, and a suite of offices in Sault Ste. Marie.

Paint-spattered and tired, Mrs. Thompson rounds off her day by preparing supper for six and then tackling the washing and ironing.

But she's not complaining. "I love painting and get a great deal of satisfaction out of it."

Her new career was launched more than a year ago when the Thompsons moved into their new home. Joyce and her husband, Howard, an employee at the Algoma Steel Corporation, decided to finish the wood-work themselves.

## REAL WORKER

Joyce wanted blonde wood work to match her furniture. A painter friend was so impressed with her work that he persuaded her to help him. A cousin building contractor, soon had Mrs. Thompson finish the wood work in the houses he was constructing.

The Goulais bay school was her first independent job.

"My mother loathes painting but she thought I'd be on the job for weeks so she offered to help me. We did the two coats in 14 days and mother says 'never again.' Now I'm on my own."

"Did you ever try painting with 65 kids running in and out around your legs and under ladders?"

The money Mrs. Thompson earns is being saved for special treatment in the United States for her youngest daughter Peggy, a cerebral palsy victim. Her three other daughters are aged 11, 10 and 5.

While Joyce is away on a job her husband and mother-in-law look after the family and home.

Mrs. Thompson's hands take a lot of abuse from sandpapering treatments done without the use of gloves. Each night she scrubs them with a nylon brush and strong laundry soap and rubs them with vaseline.

"This work I'm doing reminds me of an advertising slogan I saw once. 'Any woman can handle it—and most men.'"

THIS JUMPER DRESS in cotton, worsted and botany flannel is designed for spring or fall wear. It can be worn unadorned, as in this picture for sportswear, or with a turtle neck sweater for city life. Featuring a button-down front the dress has a belt and patch pocket.

## IODE Convention Hears of Efforts To Promote Commonwealth Goodwill

By PAULINE KENNEDY  
SAINT JOHN, N.B. (P)—Delegates to the national annual meeting of the Imperial Order Daughters of the Empire heard today of the order's efforts to promote Commonwealth goodwill.

opening of St. Helena's school at Poona, India last year. Over a period of years the IODE has contributed nearly \$30,000 to the school.

Mrs. C. M. Scott, Peterborough, Ont., convener of the Commonwealth and Empire committee, told of the progress of an Indian nurse studying in Canada under an IODE scholarship. The nurse, Miss Gnanaselvam David, a graduate of the Christian Medical College and Hospital of Vellore, India, has expressed deep appreciation of the welcome extended in Canada.

She is taking a post-graduate course in hospital administration at the University of Toronto School of Nursing. The director of the school expects Miss David to "obtain a very satisfactory result in her final examination."

During the summer Miss David will take a course at the Psychiatric Hospital, Toronto. She expects to return to India as a special assistant in the new psychiatric department of Vellore Hospital.

Mrs. Scott also told of additional nursing text books which have been translated into Hindi for nurses studying in India. This is a special project of the IODE and \$5,000 was donated by the Canadian order towards the printing program.

Mrs. Scott referred to the

REPORTS ON MAGAZINE  
A review of articles appearing in Echoes, national IODE magazine was given by Mrs. Laurence Grout, Toronto, secretary of the Echoes committee.

Mrs. Grout noted the magazine's coverage of the Coronation and floods in Britain and Holland.

She said national consideration had been given to a suggestion of the provincial chapter of Ontario that a questionnaire be published to obtain the reac-

tion of Echoes readers to the various featured columns and editorial policy generally. An analysis of replies from all parts of the country will be made in the magazine's summer issue. Echoes, said Mrs. Scott, was rated by advertising agencies as one of the top 10 Canadian national magazines. It is published quarterly and has a circulation of more than 30,000 copies.

# "OPERATION ALUMINUM"

**BRITISH COLUMBIA 1954**

The vast Kitimat hydroelectric and aluminum smelter project will be turning out aluminum by mid-summer this year. Completion of Kenney Dam in October, 1952, was the first major milestone. In December, 1953, the ten-mile, 25-foot diameter water tunnel was "holed through" Mount DuBose in the world-record time of 21 months. Three 140,000 H.P. generators are now in position in the Kemano underground powerhouse, and power will soon pass along the 50-mile transmission line to Kitimat. At Kitimat, in former wilderness, potlines for the first phase of production have been installed. Aluminum at the rate of 91,500 tons a year is scheduled to flow from Kitimat this year, thus increasing Alcan's ingot capacity to over one and a quarter billion pounds annually.

**QUEBEC 1953**

In Quebec, Alcan completed two new powerhouses and augmented its aluminum smelting facilities during 1953. The new generating stations at Chute du Diable and Chute a la Savane on the Peribonka River — one of the principal tributaries of Lake St. John — have a combined generating capacity of 540,000 H.P. The total installed generating capacity of Alcan's power plants in Quebec has thereby been increased to 2,580,000 H.P. The rated annual capacity of the added aluminum smelting facilities at Isle Maligne is 71,500 tons a year. By the end of 1953 ingot capacity in Alcan's four Quebec smelters — at Shawinigan Falls, Arvida, Isle Maligne and Beauharnois — totalled over one billion pounds a year, or about a quarter of world capacity.

Alcan embarked in 1951 on an expansion programme to meet the increased demand for aluminum. This programme, divided into two principal parts, is completed in Quebec and nearing conclusion in British Columbia.

In the fifty-four years since the first Canadian aluminum plant opened at Shawinigan Falls, Canada's aluminum industry has grown to be the second largest in the world; and Canada now exports more aluminum than any other country.

Still the need grows, both at home and abroad, for this light, strong, modern metal of many uses. And Aluminum Company of Canada is putting man-power, and money, and

engineering brains, and imagination into the job of keeping up with that demand.

Aluminum is "packaged power". The electricity needed to produce one ton of aluminum would light the average home for nearly a generation. By making use of Canada's abundant, low-cost power, this Canadian enterprise has created employment and income for tens of thousands; for the men who build and operate the dams and powerhouses, the docks and smelters and power lines it needs; and for the more than one thousand independent Canadian companies who turn aluminum into countless forms important to industry and our own daily living.
