BRITISH COLUMBIA CONQUER CANCER CAMPAIGN

For 50 years we have used little white tablets-acetylsalicylic acid-for relief of pain. Today this familiar pain-killer is available in a new form without the disadvantages of acidity, insolubility and bitter taste. It is called DISPRIN and is sold at druggists everywhere.

DISPRIN is soluble and substantially neutral. When taken in water as recommended, it enters the stomach as a true solution and not as undissolved particles. It is therefore less liable to cause stomach discomfort.

DISPRIN is readily absorbed. Because it definitely dissolves (not merely disintegrates) DISPRIN permits speedy absorption and gives quicker relief.

DISPRIN is palatable. Even children will take it readily. Science' steps forward with

DISPRIN is now available at you druggist. Bottles of 26 tablets or Handy Pocket Folders of 8.
