

SCARDED ICEBOXES are dismantled by members of the Junior Chamber of Commerce of Lawrence, Kan. Fourteen children have suffocated in similar iceboxes, stirring local demands for elimination of the death hazards. Jaycees use sledge hammers to render boxes harmless.

BOLD COONEY (left) and Andrew Strachan, both 4, of Windsor, Ont., died while entombed in an ice box stored in their shack near their homes. Their deaths brought to 16 the number who have met such deaths in Canada and the United States in the last four months.

Doctors Told To Be on Alert For Tuberculosis in Infants

AM (AP)—General decline in tuberculosis sickness and death rates have thrown many doctors off their guard against the danger of TB in infants, Richmond, Va., physicians say.

Edwin L. Kendig of the College of Virginia says that many pediatricians are guilty of "some actual neglect" to test all infants for post-tuberculosis.

At the opening session of annual meeting of the American Academy of Pediatrics in prepared paper that tuberculosis in infancy carries "grave" outlook. Earliest possible detection provided the best use of the tuberculin test on new patients more than a month of age.

Test consists of injecting small amount of extract from dead TB germs under skin of the patient, or "parching" it on the skin's surface. If the patient has TB—or had it in the past—an allergic inflammation will appear on the skin. Sometimes the

Scholarships for Music Set

ONTARIO (CP)—Daryl Irvine of Toronto and Constance Voth of Winnipeg have been chosen for 1953 Canadian scholarships by the associated boards of the Royal Schools of Music, it was announced today.

Under the scholarships, worth \$1,000 a year for three years, Irvine will study at the Royal College of Music and Miss Voth at the Royal Academy of Music. They are expected to start their studies within a year.

Council's Cemetery Decree Outrages Residents of Luton

LUTON, England (Reuters)—Some folks here are so outraged by a new regulation passed by the municipal council that they are actually talking of having their dead buried out of town.

What peevishness is the council's decision to censor inscriptions on all tombstones erected in the local cemetery of this town (population 100,000) 25 miles north of London.

The censorship decree was one of 31 passed by the town fathers to ensure that the cemetery is "tidy and respectable."

It stipulates that from now on relatives of dead must submit sketches of proposed gravemarkers and the epitaphs intended for them.

Parks director R. J. English, the man whose job it will be to scrutinize inscriptions, has definite ideas about the type of tombstone literature he'll ban.

"I won't approve epitaphs criticizing the dead person's relatives or other people," he said.

The censorship was railroaded through by a narrow majority. One of its staunchest opponents was Alderman Walter Roberts. He said he fought against it because the townspeople's "deepest feelings are involved."

"A grave is a personal thing," he said. "The decision about tombstones and inscriptions must rest with relatives of the deceased."

Also indignant about tombstone censorship in Luton is the crusading London Daily Mirror.

Urging the people of Luton to do away with "uniformity in the cemetery," the Mirror said:

"It would be a shame to be without inscriptions like this:

"Here lies John Racket. In his wooden jacket. He kept neither horses nor mules."

"He lived like a hog. He died like a dog, And left his money to fools."

IN DAYS LONG PAST, Samson's hair was the source of his physical strength, but 14-year-old Robert Hollingsworth of Dallas, Texas, is letting his hair grow because his future's involved. Robert's mother says chiropractors told her when Robert was a toddler that his hair gave him healing power in his hands. The youth has been offered a position paying \$500 a month if the prophecy proves correct.

AIDS STUDENTS
KARACHI, Pakistan (CP)—The Punjab government has set aside a fund of about £150,000 for award of scholarships to more than 2,000 poor and deserving students throughout the province.

OFF TO KOREA
OSLO (CP)—Dr. Erik Thoresen, chief surgeons at the Strinda Hospital, has been appointed new head of the Norwegian Hospital in Korea. The hospital has treated about 50,000 cases in the last two years.

There is no "overnight cure" for irregularity

But there is a simple, natural answer to the common problem of irregularity due to lack of bulk

There are men and women (perhaps you're one of them) who won't let "nature take its course." THEY TRY TO SUBSTITUTE UNNATURAL "FORCING ACTION" FOR THE NATURAL REGULARITY WHICH SENSIBLE DAILY HABITS AND SUFFICIENT BULK IN THE DIET COULD PROBABLY MAINTAIN.

Many fall into the habit of using laxatives in a way laxative makers never intended. They take "big doses" willy-nilly without even reading the directions on the label.

Naturally, such overdoing—with products intended only for overnight relief of a temporary stoppage—exerts upon the delicate digestive system an unnatural strain.

There's nothing wrong, of course, with taking laxatives occasionally. If you feel you have to take a laxative, just be sure you take it wisely—in an accurate, recommended dose.

BUT THERE IS A WAY TO AVOID TAKING DRUG-TYPE LAXATIVES AND TO PLACE YOUR DEPENDENCE ON NATURE, IF LACK OF BULK IN THE DIET IS YOUR TROUBLE.

In many natural foods—such as certain vegetables, fruits, and grains—nature grows abundant natural bulk which normally and naturally aids the rhythmic process of elimination.

In no other natural food is natural bulk so ideally found as in the outer layers of the whole wheat kernel, known generally as bran.

Bran is nature's "laxative food instead of a medicine." When properly processed and shredded, whole wheat bran yields smooth natural bulk that the digestive system can handle in a natural way.

The Kellogg Company has made whole wheat bran into a delicious breakfast cereal—Kellogg's All-Bran.

KELLOGG'S ALL-BRAN PERFORMS NATURALLY WHAT DRUG-TYPE LAXATIVES DO CHEMICALLY. IT HELPS CLEAR THE INTESTINES OF WASTE IN A NATURAL WAY. IT PROVIDES SOFT NATURAL BULK FOR EASY NATURAL ACTION.

There is no stomach upset, no churning, no after-effect except the feeling of satisfaction and fulfillment that comes with natural, normal elimination.

To obtain lasting relief, of course, Kellogg's All-Bran must be eaten regularly. You can have it for breakfast every morning secure in the knowledge that it isn't habit-forming.

More than one million servings of Kellogg's All-Bran are consumed each day. This popularity of itself is proof that this natural laxative cereal lives up to what we say about it.

But even better proof comes from thousands of satisfied All-Bran users. They write of their own free will to tell us what natural relief they receive from eating Kellogg's All-Bran daily and drinking plenty of water.

EAT KELLOGG'S ALL-BRAN EVERY MORNING FOR BREAKFAST FOR 10 DAYS. THEN, IF YOU'RE NOT COMPLETELY SATISFIED, SEND THE EMPTY CARTON TO THE KELLOGG COMPANY, LONDON, ONTARIO, AND GET DOUBLE YOUR MONEY BACK.

Remember—Kellogg's All-Bran has helped millions. Why not you?

Logging is a risky business, but

Cutting down trees is dangerous work—if you get careless. It isn't easy to fight carelessness, either. It takes time and patience and unflagging determination. It takes real teamwork.

In the last six years, British Columbia has shown the world what real teamwork can accomplish.

Logging accidents in this Province are down 41% over 1947. Log production has increased 18% in the same period. This outstanding record has been achieved through the combined efforts of employers and employees, the International Woodworkers Union, the B.C. Loggers' Association and the Workmen's Compensation Board. All have worked together. All deserve a full share of credit.

During the past week B.C.'s entire forest industry has been observing Forest Products Safety Week.

We at Columbia Cellulose are proud of our own good safety record both in mill and woods operations. We pledge our continued efforts to make every week safety week—and every year a safer year in the forests entrusted to our care.
