Rare Birds Spied

MELVILLE, Sask. @- Nine large white birds, believed to be rare whooping cranes, have been sighted in the Lorilee district 90 miles northeast of Regina.

Bill Bonter, Melville sportsand four companions sighted seven of the big birds as they were landing near the village. Two more were spotted in a slough.

Mr. Bonter described the birds as being very large with black wing tips. He said they emitted sharp cries as they flew.
