Plans Near Completion for U.S. To Funnel Military Aid to Europe

WASHINGTON (AP) — Plans are about completed for funneling United States military aid to West European countries through the projected European Defence Community as soon as it is ratified.

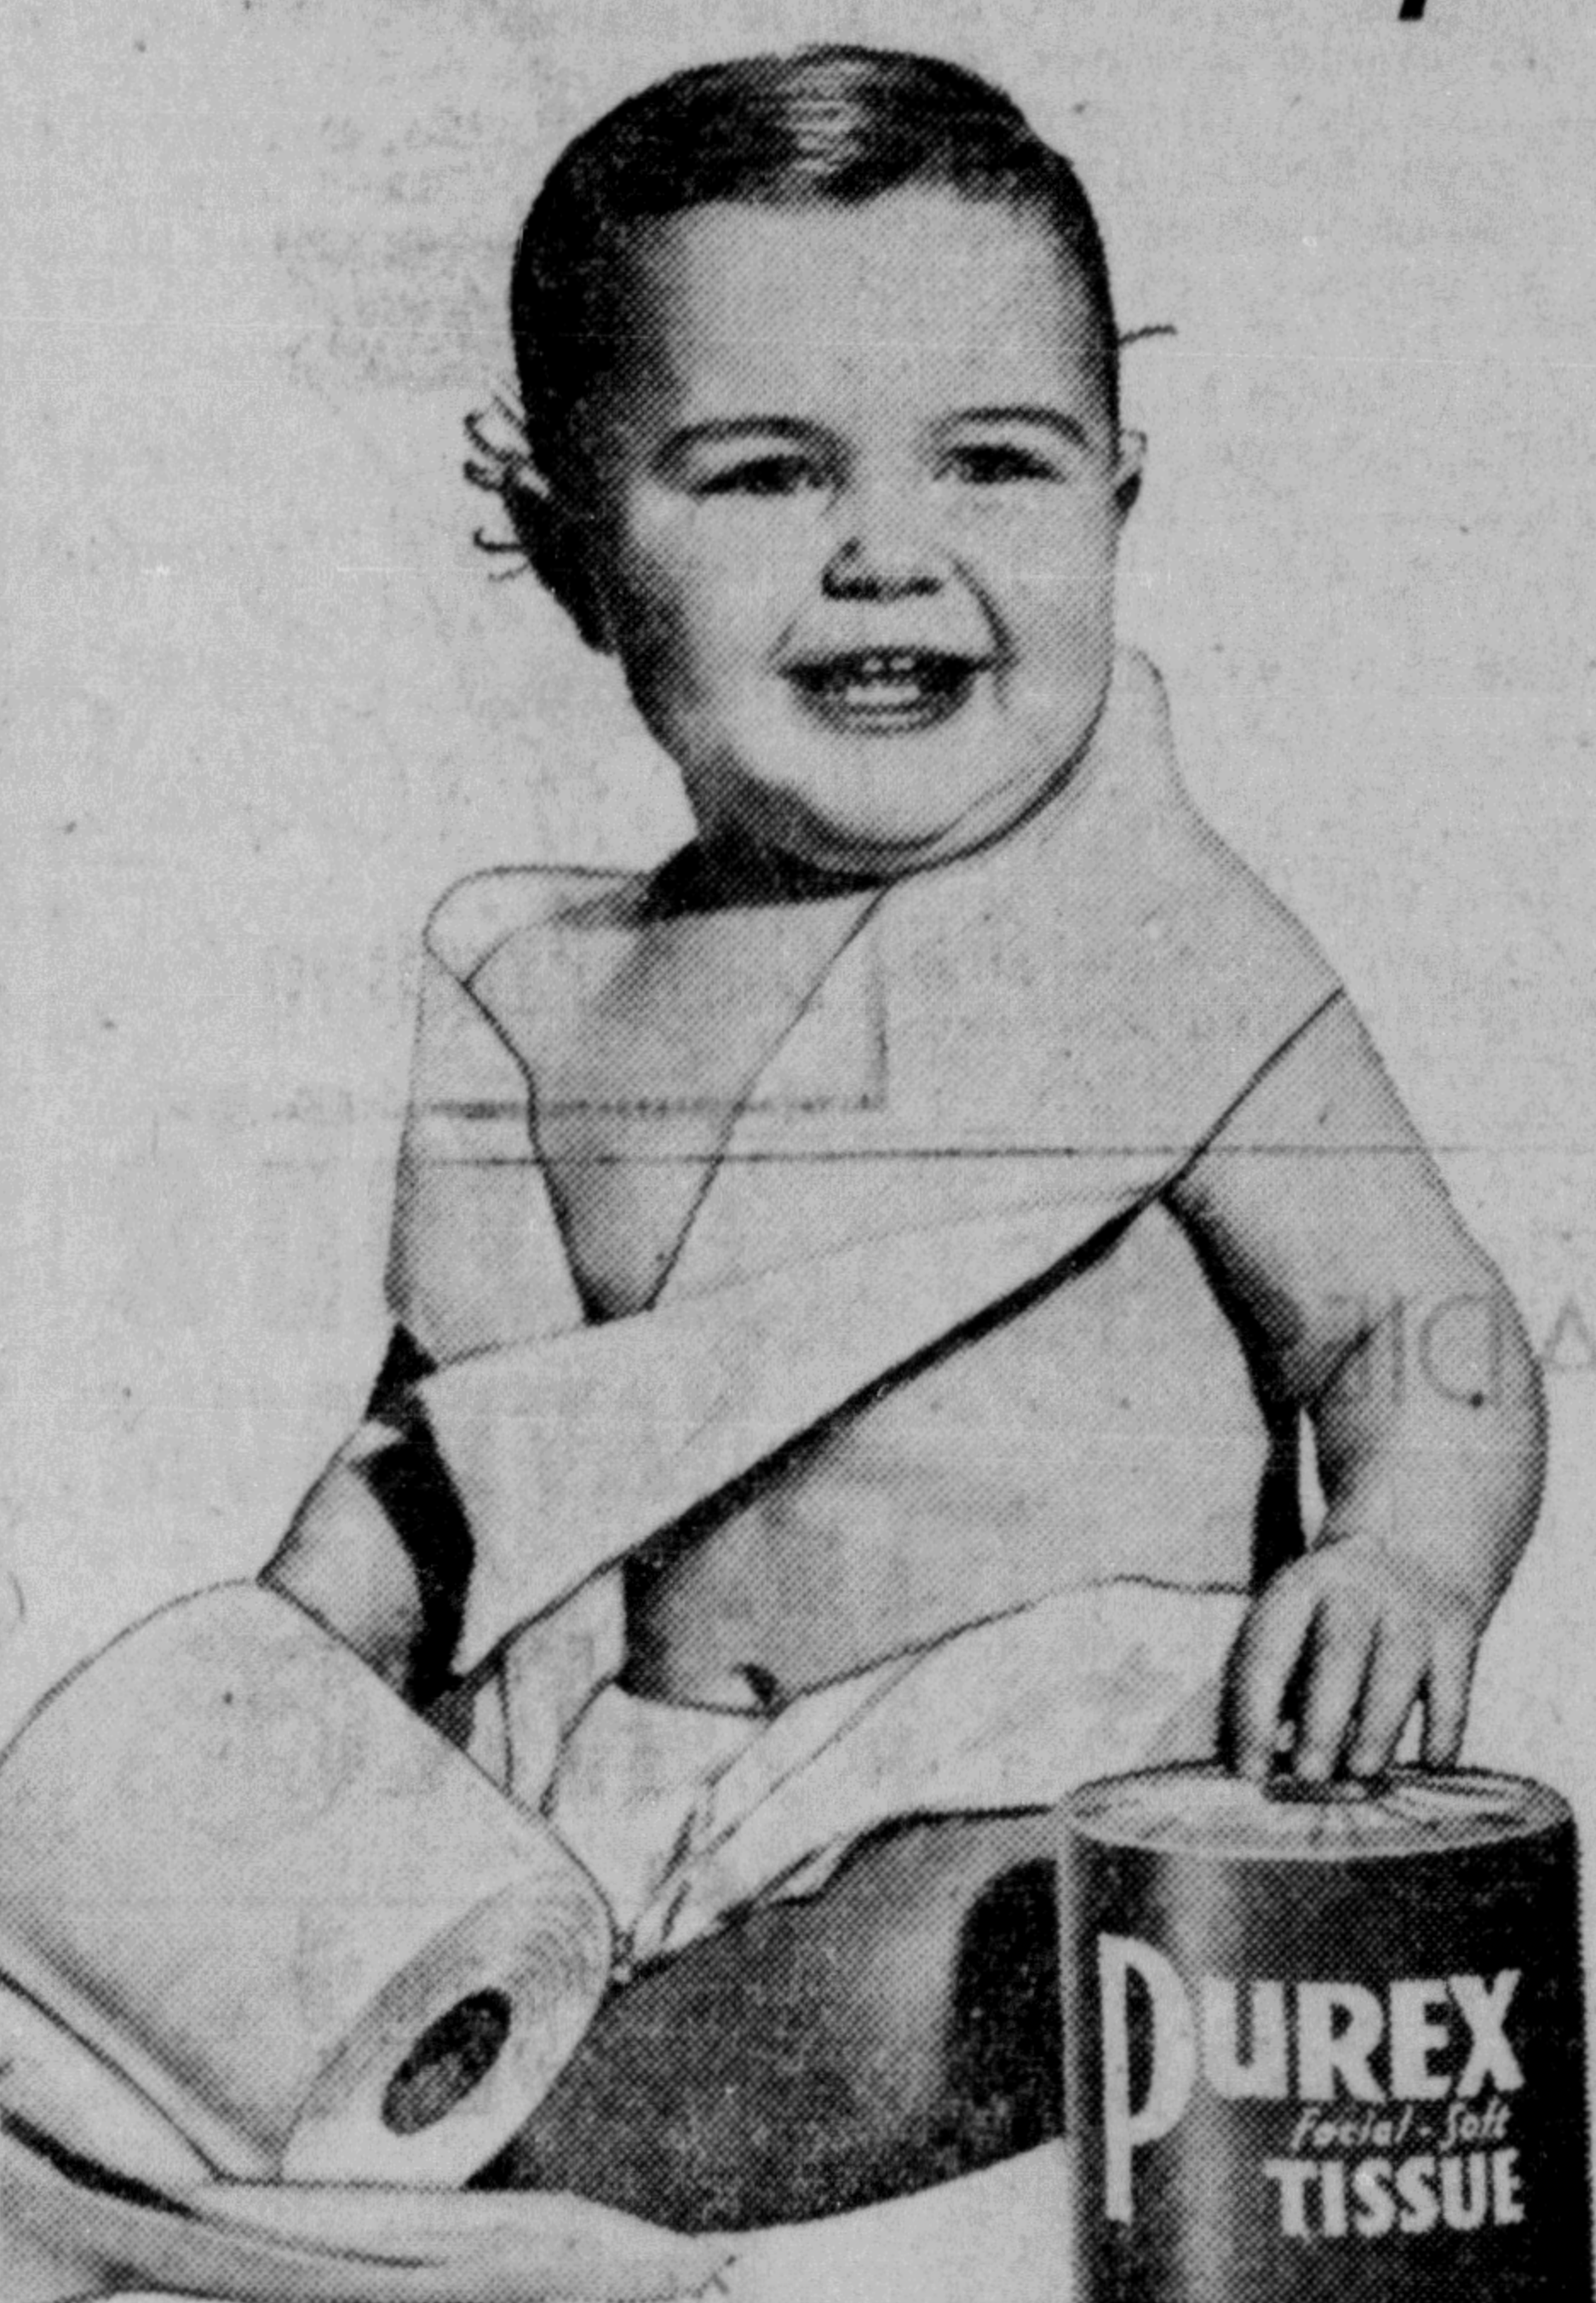

This was reported today by government officials who pictured State Secretary Dulles and other top officials as confident that the long-stalled EDC treaty will be finally approved in the next three or four months.

That action would clear the way for rearming West Germany, the only state which has ratified it so far. Other signers are France, Italy, Belgium, The Netherlands and Luxembourg.

Informants have said a special agreement covering the delivery of American aid to EDC, being worked out with a defence community preparatory commission at Paris, is substantially completed.

In general, it follows the line of agreements required by the U.S. Congress with all the individual countries receiving American assistance.
